

WHITE PAPER
ON CRIME
2022

RESEARCH AND TRAINING INSTITUTE
MINISTRY OF JUSTICE
JAPAN

NOTES

[SOURCES]

I. Original White Paper on Crime

1 Original White Paper on Crime

This White Paper is a summary and translated version of the “White Paper on Crime” 2022 (the original version is written/described in Japanese), one of annual publications of the Ministry of Justice in Japan. The translations in this Paper are tentative and are to be considered solely as a reference. For more statistics and further details, refer to the original Japanese version.

II. Data sources

Statistics, Tables, Figures and other information presented in the White Paper on Crime are specially provided by the respective bureaus/departments of the Ministry of Justice and the Immigration Services Agency, and are also obtained from various research or surveys conducted by relevant agencies, as well as the following official statistics:

- Criminal Statistics of the National Police Agency (Criminal Investigation Bureau, National Police Agency);
- Annual Report of Statistics on Prosecution (Judicial System Department, Minister’s Secretariat, Ministry of Justice);
- Annual Report of Judicial Statistics (General Secretariat, the Supreme Court);
- Annual Report of Statistics on Correction (Judicial System Department, Minister’s Secretariat, Ministry of Justice); and
- Annual Report of Statistics on Rehabilitation (Judicial System Department, Minister’s Secretariat, Ministry of Justice).

The statistical data sources up to May 14, 1972 do not include data for Okinawa Prefecture.

III. Coverage of statistical materials

The data in this Paper are based on statistical materials that were available by the end of July 2022. Unless otherwise indicated, the most recent annual numbers are of the year 2021. Any corrections made to the data offered or publicized by relevant agencies will be reflected in subsequent editions of this Paper if deemed necessary.

[OFFENSES AND TERMS]

I. Definitions of offenses

The offense names in this White Paper are used in accordance with the following meanings and the definitions in the sources, unless specified otherwise.

1 Penal Code offenses

“**Penal Code offenses,**” in principal, refer to those offenses prescribed by the Penal Code (Act No. 45 of 1907) and violations of the following laws, except offenses against the Penal Code that fall under 2 and 3 below:

- (i) Explosives Control Act (Cabinet Order No. 32 of 1884);
- (ii) Act Relating to Duels (Act No. 34 of 1889);
- (iii) Act on Punishment of Crimes Related to Stamps (Act No. 39 of 1909);
- (iv) Act on Punishment of Physical Violence and Others (Act No. 60 of 1926);
- (v) Act on Prevention and Punishment of Robbery and Theft (Act No. 9 of 1930);
- (vi) Act on Punishment of Unlawful Seizure of Aircraft (Act No. 68 of 1970);
- (vii) Act on Punishment of Crime to Cause Pollution Harmful for Human Health (Act No. 142 of 1970);
- (viii) Act on Punishment of Acts to Endanger Aviation (Act No. 87 of 1974);
- (ix) Act on Punishment of Compulsion and Other Related Acts Committed by Those Having Taken Hostages (Act No. 48 of 1978); and
- (x) Act on Punishment of Organized Crimes and Control of Crime Proceeds (Act No. 136 of 1999).

As a side note, each category of offenses, in principal, includes the following variations as provided in the Penal Code:

- (i) attempt;
- (ii) preparation;
- (iii) inducement and accessoryship;
- (iv) offenses which aggravate the gravity of the punishment of the base offense (e.g., robbery causing death or injury);
- (v) offenses such as when the gravity of the punishment is aggravated or mitigated based on the types of social activities, purposes, status of an offender or other elements as prescribed in the Penal Code; and
- (vi) offenses that aggravate the punishment as prescribed in the Act on Prevention and Punishment of Robbery and Theft.

2 Dangerous driving causing death or injury

“**Dangerous driving causing death or injury**,” in principal, refers to offenses provided in Article 2, Article 3, and Article 6, paragraphs (1) and (2) of the Act on Punishment of Acts Inflicting Death or Injury on Others by Driving a Motor Vehicle (Act No. 86 of 2013; hereinafter referred to as the “Act on Fatal/Injurious Driving”) and offenses provided in Article 208-2 of the Penal Code prior to its amendment by Act No. 86 of 2013.

3 Negligent driving offenses causing death or injury

“**Negligent driving offenses causing death or injury**,” in principal, refer to [1] offenses provided in Article 4, Article 5, and Article 6, paragraphs (3) and (4) of the Act on Fatal/Injurious Driving, offenses that cause death or injury through negligence in vehicle driving (offenses provided in Article 211, paragraph (2) of the Penal Code prior to its amendment by Act No. 86 of 2013) and [2] offenses causing death or injury through (gross) negligence in pursuit of social activities.

4 Special Acts offenses

“**Special Acts offenses**,” in principal, refer to offenses other than those referred to in 1 to 3 above and include violations of Prefectural/Municipal Ordinances and Regulations.

- (1) “**Road traffic-related violations**” refer to violations of the Road Traffic Act (Act No. 105 of 1960) and Act on Assurance of Car Parking Spaces and Other Matters (Act No. 145 of 1962).
- (2) “**Violations of four traffic-related Acts**” refer to road traffic-related violations, and violations of the Road Transport Vehicle Act (Act No. 185 of 1951) and Automobile Liability Security Act (Act No. 97 of 1955).
- (3) “**Violations of traffic-related Acts**” refer to violations of four traffic-related Acts and violations of the Road Transportation Act (Act No. 183 of 1951), Road Act (Act No. 180 of 1952), National Highway Act (Act No. 79 of 1957), Parking Lot Act (Act No. 106 of 1957), Act on Special Measures Concerning Prevention of Traffic Accident Caused by Large-Sized Automobiles Carrying Earth, Sand and Others (Act No. 131 of 1967), Act on Special Measures Concerning Regulation of Taxi Services (Act No. 75 of 1970), Consigned Freight Forwarding Business Act (Act No. 82 of 1989), Motor Truck Transportation Business Act (Act No. 83 of 1989), Studded Tires Regulation Act (Act No. 55 of 1990), and Act on Regulation of Substitute Driving Service (Act No. 57 of 2001).

II. Definitions of terms

1 Police

- (1) The number of “**reported cases**” refers to the number of cases occurrence of which became known to the police.
- (2) “**Crime rate**” refers to the number of reported cases per 100,000 population.
- (3) The number of “**cleared cases**” or “**cases cleared**” refers to the number of cases cleared by the police or other investigative authorities. The number is not limited to cases referred to public prosecutors but includes cases disposed by the police as trivial offenses and other dispositions.
- (4) “**Clearance rate**” refers to the percentage of cleared cases among the number of reported cases. Since the “cleared cases” include reported cases in the previous years, the “clearance rate” may exceed 100%.
- (5) The number of “**cleared persons**” or “**persons cleared**” refers to the number of persons cleared by the police or other investigative authorities. The same applies to juveniles, foreign nationals, etc.

2 Prosecution and courts

- (1) The number of “**persons received by public prosecutors**” refers to the number of suspects in cases directly detected or received by public prosecutors or referred from judicial police officers (including special judicial police officers of investigative agencies and internal inspectors of the National Tax Agency).
- (2) “**Prosecution rate**” refers to the percentage of persons prosecuted among the sum of the number of persons prosecuted and not prosecuted.
- (3) “**Public trial prosecution rate**” refers to the percentage of persons prosecuted to a public trial among the sum of the number of persons prosecuted and not prosecuted.
- (4) “**Court of first instance**” refers to ordinary trial procedures at district courts and summary courts and excludes summary proceedings.
- (5) “**Conclusive disposition**” refers to:
 - (i) when the data is from the Annual Report of Prosecution, disposition of a case by a prosecutor, excluding transfer of a case between Public Prosecutors Offices or disposition to suspend an investigation; and
 - (ii) where the data is from the Annual Report of Judicial Statistics or the General Secretariat of the Supreme Court, disposition of a case by a court, excluding transfer of a case between other courts (in Chapter 2 of Part 3, cases consolidated are not individually counted as disposed cases).

3 Correction and rehabilitation

- (1) “**Newly sentenced inmates**” refer to inmates newly admitted to penal institutions each year for reasons such as the execution of their finalized sentence.
- (2) “**Reimprisoned inmate**” refers to a person who has been imprisoned before.
- (3) “**Parole rate**” refers to the percentage of inmates released on parole among the total number of inmates released upon the completion of their term of imprisonment (with or without partial suspension of execution) and inmates released on parole.
- (4) “**Probation rate**” refers to the percentage of persons granted (full or partial) suspension of the execution of their sentence of imprisonment and placed under supervision for a period of suspension among the total number of persons granted (full or partial) suspension of the execution of their sentence of imprisonment (with or without supervision).

4 Juvenile cases

- (1) Juvenile
 - (i) “**Junior juvenile**” refers to a person aged 14 or 15;
 - (ii) “**Intermediate juvenile**” refers to a person aged 16 or 17; and
 - (iii) “**Senior juvenile**” refers to a person aged 18 or 19.
- (2) Juvenile delinquent
 - (i) “**Juvenile offender**” refers to a juvenile who has committed a crime (aged 14 or older at the time of the crime);
 - (ii) “**Juvenile offender under 14**” refers to a juvenile under 14 years of age who has violated laws and regulations of a criminal nature; and
 - (iii) “**Pre-delinquent**” refers to a juvenile who is, in light of his/her personality or environment, likely to commit crimes or violate laws and regulations of a criminal nature in the future due to his/her propensity not to submit to legitimate supervision by a custodian or other reasons.
- (3) “**Juveniles newly committed to juvenile training schools**” refer to juveniles newly committed to juvenile training schools by rulings to refer the juveniles to juvenile training schools.

5 Others

- (1) “**Rate per population**” refers to the rate of persons in a specific group per 100,000 persons of the population.
- (2) “**Percentage of female**” refers to the percentage of females among the total number of males and females.
- (3) “**Percentage of juveniles**” refers to the percentage of juveniles among the total number of persons.
- (4) “**Elderly**” or “**elderly person**” refers to persons aged 65 or older.
- (5) “**Visiting foreign nationals**” refer to foreign nationals staying in Japan except those staying under permanent residency, special permanent residency, or statuses related to the U.S. forces based in Japan, and those whose status is unclear.

If the data source is the Criminal Statistics of the National Police Agency, the term refers to foreign nationals staying in Japan except those staying under established residency (permanent residency, spouse or other dependency status of permanent residents and special permanent residency), or statuses related to the U.S. forces based in Japan, and those whose status is unclear.

- (6) “**Previous conviction**” refers to a previous conviction based on a finalized judgment.
- (7) “**Treatment**” refers to treatment of persons cleared for an offense in the subsequent stages of prosecution, court, correction and/or rehabilitation.
- (8) “**Full suspension of execution of sentence**” refers to the full suspension of execution of sentence provided in Article 25 of the Penal Code.
- (9) “**Partial suspension of execution of sentence**” refers to the partial suspension of execution of sentence provided in Article 27-2 of the Penal Code and Article 3 of the Act on Suspension of Execution of Part of the Sentence Rendered to a Person Who Has Committed a Drug-related Crime (Act No. 50 of 2013).

[PRESENTATION IN THE WHITE PAPER]

I. Numbering of figures and tables

The numbering of figures and tables is indicated in the order of Part, Chapter, and Section. For example, Fig. 2-4-1-3 refers to the third figure in Section 1 of Chapter 4 of Part 2. This English version of the White Paper on Crime 2022 does not necessarily correspond to the numbering of the figures and tables of the original Japanese White Paper on Crime 2022.

II. Presentation of values, etc.

1 Presentation of tables:

- (1) “-” refers to zero in number or not applicable
- (2) “0” refers to a number that does not reach one when rounded off
- (3) “0.0” refers to a number that does not reach 0.1 when rounded off
- (4) “...” refers to data/statistical materials that are not available, or the case where the parameter is zero

2 Presentation of figures:

- (1) “0” refers to zero in number or not applicable
- (2) “0.0” refers to a number that does not reach 0.1 when rounded off

[OTHERS]

I. Calculation

The proportion and percentage, etc. are rounded off. Therefore, the sum of the proportions may not add up to 100.0.

The sum or difference of each proportion is calculated by first adding or subtracting values and then rounding off the resulting value. Thus, the value may not match the value calculated by first rounding off each value and then adding or subtracting the rounded off values.

For example, when calculating the difference between 12.76 and 7.53, first subtract 7.53 from 12.76 and then round off the value 5.23 to obtain the result of 5.2, rather than subtracting the rounded off value of 7.5 from the rounded off value of 12.8 (which yields 5.3).

II. Website

This White Paper on Crime 2022 and its original Japanese version are available on the website of the Ministry of Justice of Japan.

TABLE OF CONTENTS

PART 1 Crime Trends

	PAGE
Chapter 1 Penal Code Offenses	3
Section 1 Overview	3
Section 2 Penal Code Offenses by Category	4
1 Theft	4
2 Rape and forcible indecency	5
3 Other Penal Code offenses	6

Chapter 1 Penal Code Offenses

Section 1 Overview

Fig. 1-1-1-1 shows the trend in the number of reported cases, cleared persons and clearance rate for Penal Code offenses since 1946.

Fig. 1-1-1-1 Penal Code offenses: reported cases, cleared persons and clearance rate

[2] Dangerous driving causing death or injury, and negligent driving offenses causing death or injury

- Notes: 1. Numbers until 1955 include violations of laws and regulations of a criminal nature committed by juveniles under 14 years of age.
 2. "Penal Code offenses" in [1] do not include offenses causing death or injury through (gross) negligence in pursuit of social activities until 1965.
 3. "Dangerous driving causing death or injury, and negligent driving offenses causing death or injury" in [2] include offenses causing death or injury through (gross) negligence in pursuit of social activities not related to vehicle driving until 1965.

Source: Criminal Statistics of the National Police Agency

Section 2 Penal Code Offenses by Category

1 Theft

Theft accounts for nearly 70% of the reported cases for Penal Code offenses. Fig. 1-1-2-1 [1] shows the trend in the number of reported/cleared cases and the clearance rate for theft.

Fig. 1-1-2-1 [2] shows the trend in the number of reported/cleared cases and the clearance rate for Penal Code offenses excluding theft.

Fig. 1-1-2-1 Penal Code offenses: reported/cleared cases and clearance rate (theft/ Penal Code offenses excluding theft)

Note: "Penal Code offenses excluding theft" for the years 2002–2014 include dangerous driving causing death or injury.
Source: Criminal Statistics of the National Police Agency

2 Rape and forcible indecency

The Act Partially Amending the Penal Code (Act No. 72 of 2017) came into effect in July 2017. The Act widened the definition of rape, so that it makes no distinction based on a victim’s sex, and includes anal and oral intercourse. The Act also raised the minimum of a statutory penalty, newly established indecency and rape by a person who has custody of a victim, and changed rape and forcible indecency into a crime indictable without a complaint.

Fig. 1-1-2-2 shows the trend in the number of reported/cleared cases and the clearance rate for rape (including quasi rape, and rape by a custodian after the above-mentioned amendment; the same applies hereinafter).

Fig. 1-1-2-2 Rape: reported/cleared cases and clearance rate

Source: Criminal Statistics of the National Police Agency

Fig. 1-1-2-3 shows the trend in the number of reported/cleared cases and the clearance rate for forcible indecency (including quasi forcible indecency and indecency by a custodian after the above-mentioned amendment; the same applies hereinafter).

Fig. 1-1-2-3 Forcible indecency: reported/cleared cases and clearance rate

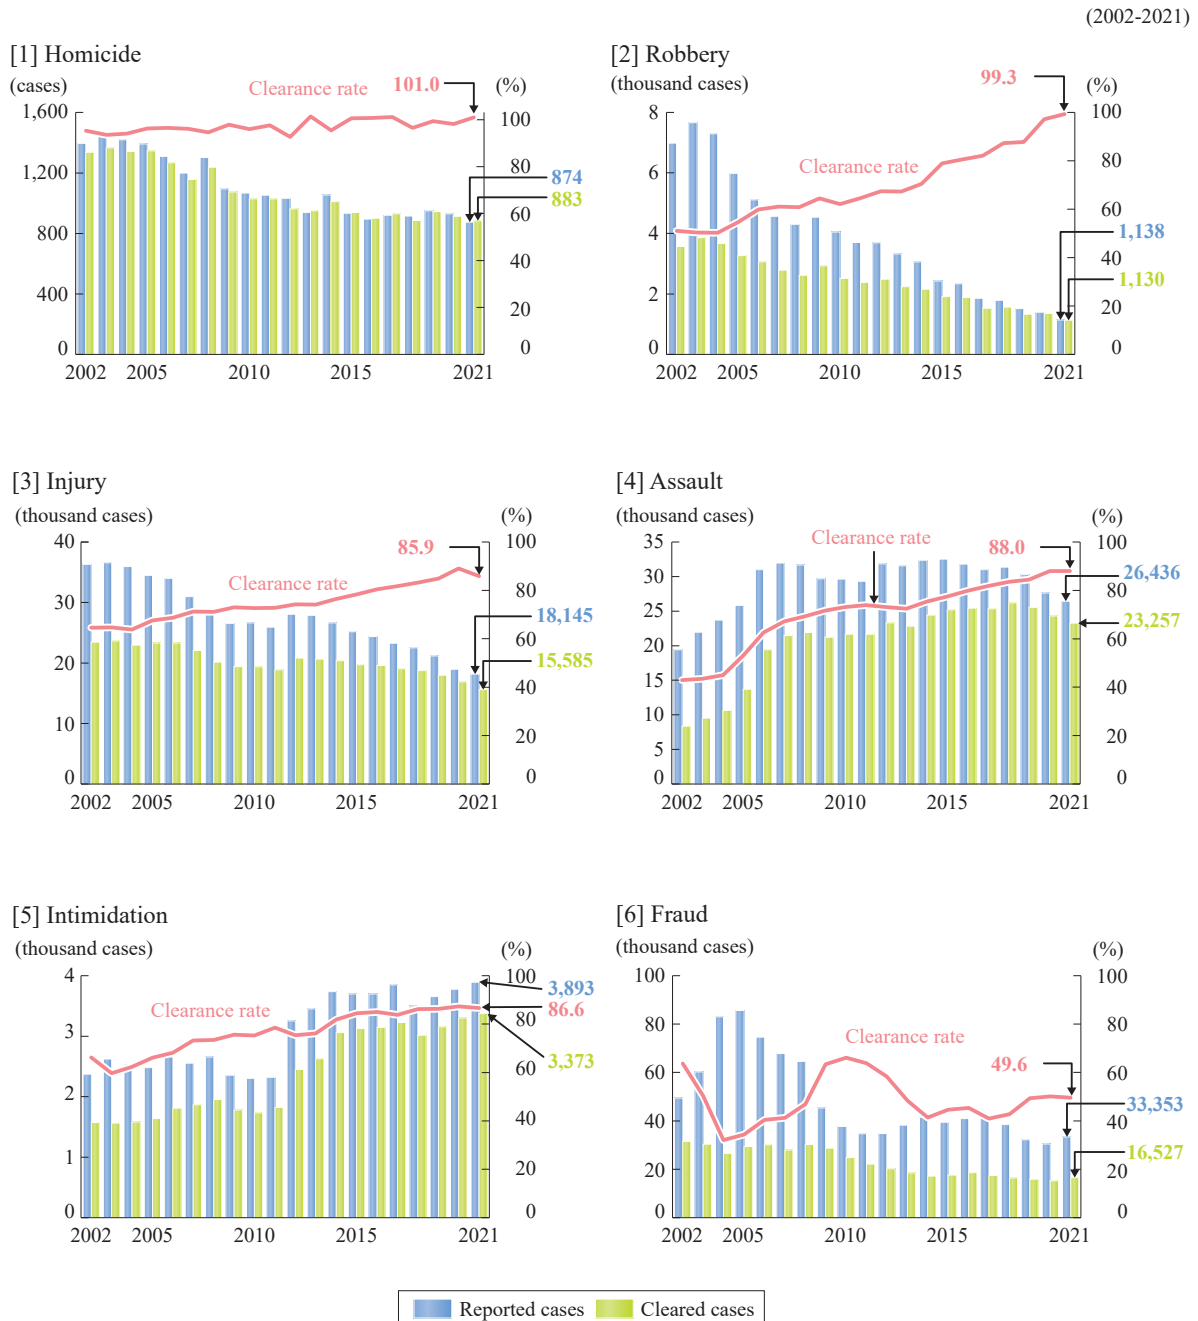

Source: Criminal Statistics of the National Police Agency

3 Other Penal Code offenses

Fig. 1-1-2-4 shows the trend in the number of reported/cleared cases and the clearance rate for other major Penal Code offenses.

Fig. 1-1-2-4 Penal Code offenses: reported/cleared cases and clearance rate (by type of offense)

[7] Extortion
(thousand cases)

[8] Embezzlement (including embezzlement of lost property)
(thousand cases)

[9] Arson
(cases)

[10] Obstruction of performance of public duty
(thousand cases)

[11] Breaking into a residence
(thousand cases)

[12] Damage to property
(thousand cases)

Reported cases (blue bar) Cleared cases (green bar)

Note: Since “cleared cases” may include cases reported during the previous years, the “clearance rate” could exceed 100%.

PART 2

Treatment of Offenders

Vocational Training in a Penal Institution

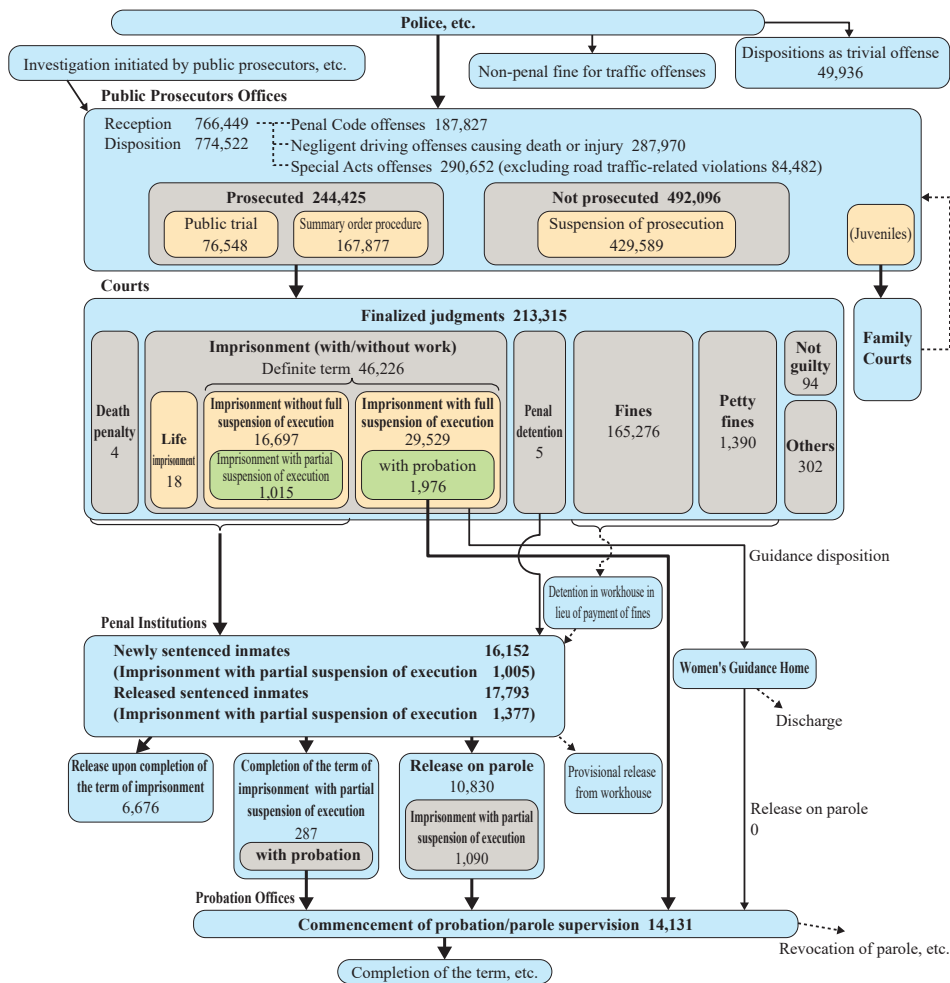

Source: Correction Bureau, Ministry of Justice

Chapter 1 Overview

Persons cleared for offenses by the police or other special judicial police officers (officials of investigative agencies other than the police, who have specific jurisdiction; e.g., coast guard officers, narcotics agents, etc.) are treated in stages of prosecution, trial, institutional correction and rehabilitation services. **Fig. 2-1-1** shows the number of persons treated in these stages in 2021.

Fig. 2-1-1 Outline of treatment of offenders

Numbers denote persons in 2021

- Notes:
1. Numbers indicate persons in 2021 and include juveniles.
 2. "Disposition as a trivial offense" refers to dispositions for trivial offenses (offenses designated by public prosecutors, such as theft, assault and embezzlement including embezzlement of lost property) committed by those aged 20 or older that judicial police officials do not refer to public prosecutors pursuant to the proviso to Article 246 of the Code of Criminal Procedure.
 3. Numbers in "Public Prosecutors Offices" count the total number of persons in cases received/disposed by public prosecutors offices, thus a person received/disposed twice for different cases is counted as two persons.
 4. "Released sentenced inmates" consist of the number of persons who were released on parole, upon completion of their term of imprisonment with partial suspension of execution, and upon completion of their term of imprisonment.
 5. "Commencement of probation/parole supervision" consists of the number of inmates released from a penal institution on parole, persons sentenced with partially or fully suspended imprisonment with probation and those released from a women's guidance home on parole.
 6. "Others" in "finalized judgments" consist of the number of instances of dismissal for judicial bar, dismissal of prosecution, jurisdictional incompetence and remission of punishment.

 Annual Report of Statistics on Prosecution
 Annual Report of Statistics on Correction
 Annual Report of Statistics on Rehabilitation
 The Rehabilitation Bureau, Ministry of Justice

Chapter 2 Prosecution

Judicial police officers are to refer every criminal case to **public prosecutors**, except [1] cases subject to disposition as trivial offenses (certain minor offenses committed by those aged 20 or older with particularly strong mitigating factors that satisfy public prosecutors' predesignated criteria, are not required to be referred to public prosecutors pursuant to the proviso stipulated by Article 246 of the Code of Criminal Procedure) and [2] those of certain violations of the Road Traffic Act that are subject to *Hansokukin* (administrative fine).

Public prosecutors investigate cases referred by the police or other special judicial police officers. In addition, public prosecutors may institute an investigation, on their own initiative if necessary, or in response to a complaint or accusation directed to them. In concluding the investigation, they decide whether or not to prosecute a suspect, based on factors such as whether or not his/her act constitutes an offense and punishment is required on his/her case.

Section 1 Reception

Fig. 2-2-1-1 shows the composition of persons received by public prosecutors in 2021 by type of offense committed.

Fig. 2-2-1-1 Persons received by public prosecutors: composition by type of offense

(2021)

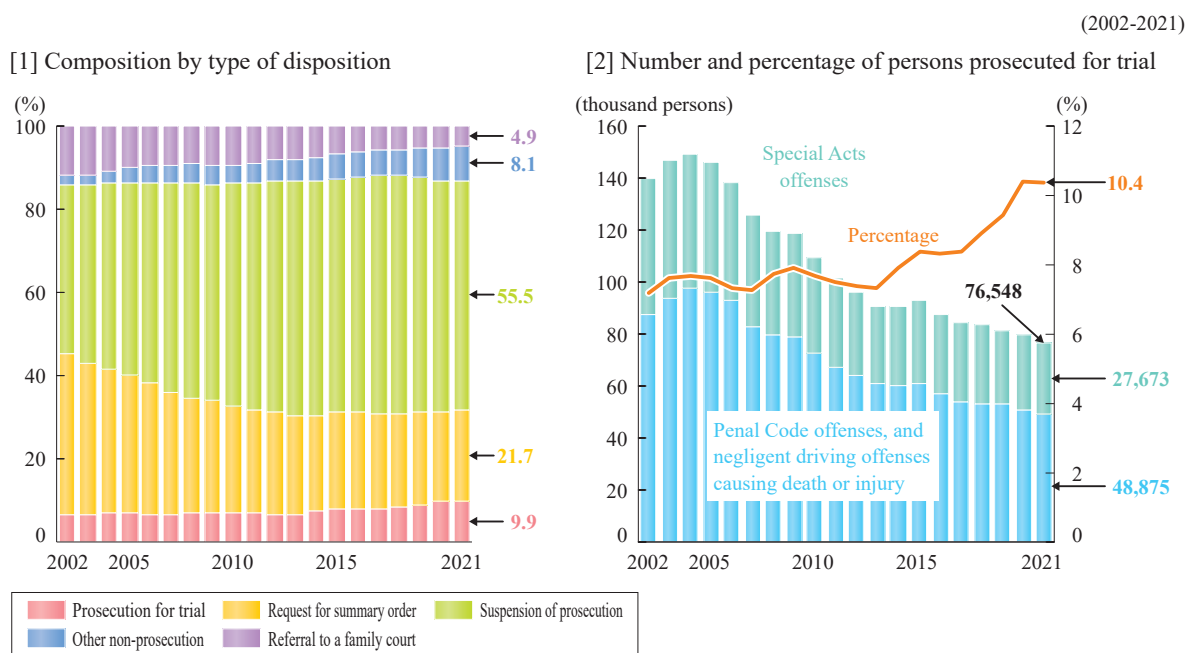

Source: Annual Report of Statistics on Prosecution

Section 2 Dispositions

Where a public prosecutor decides to prosecute a person, they request a public trial or a summary procedure. A public prosecutor decides not to prosecute a person where [1] a precondition for prosecution (e.g., a victim’s complaint for certain offenses) is not satisfied, [2] the person's act does not constitute an offense (or the person is not punishable due to insanity, etc.), or [3] evidence is not sufficient to prove an offense. A public prosecutor may also decide not to prosecute a case even where there is sufficient evidence to prove an offense if it deems unnecessary to be prosecuted based on factors such as suspect’s character, age, environment, gravity of an offense and circumstances during or after an offense (suspension of prosecution).

Fig. 2-2-2-1 shows, in relation to persons conclusively disposed by public prosecutors (including negligent driving offenses causing death or injury and road traffic-related violations), the trend in the composition of such persons by type of disposition and the number and percentage of persons prosecuted for trial.

Fig. 2-2-2-1 Persons disposed by public prosecutors: composition by type of disposition and number of persons prosecuted for trial, etc.

Source: Annual Report of Statistics on Prosecution

Fig. 2-2-2-2 shows the trend in the number of persons prosecuted or not prosecuted and the prosecution rate for [1] Penal Code offenses and [2] Special Acts offenses excluding road traffic-related violations.

Fig. 2-2-2-2 Persons prosecuted, not prosecuted, etc.

Source: Annual Report of Statistics on Prosecution

Table 2-2-2-3 shows the number of persons not prosecuted by reason of non-prosecution (excluding negligent driving offenses causing death or injury and road traffic-related violations) in 2021.

Table 2-2-2-3 Persons not prosecuted (by reason)

(2021)

Total	Suspension of prosecution	Insufficient evidence	Withdrawal of complaint, etc.	Insanity	Others
149,678	102,625	33,183	6,141	432	7,297
(100.0)	(68.6)	(22.2)	(4.1)	(0.3)	(4.9)

Notes: 1. Numbers exclude negligent driving offenses causing death or injury, and road traffic-related violations.

2. "Insufficient evidence" includes no evidence.

3. "Withdrawal of complaint, etc." refers to lack, invalidity or withdrawal of a complaint, accusation or a claim when a complaint, accusation or a claim from a prescribed party is a prerequisite to prosecute an offense.

4. "Others" include expiration of statute of limitations, death of a suspect, etc.

5. Numbers in parentheses indicate the percentage of persons categorized in the respective categories among the total number of persons not prosecuted.

Source: Annual Report of Statistics on Prosecution

Chapter 3 Courts

In principle, a **district court** (for all offenses except for the offense of insurrection and those subject to a penalty of a fine or less) or a **summary court** (for offenses subject to a penalty of a fine or less, offenses for which a fine is an optional statutory penalty or certain predesignated offenses including habitual gambling) is designated as a court of first instance for a criminal case.

Trials in courts of first instance are held in public. Where a defendant is found guilty, and is subject to the statutory penalty provided for an offense, possible punishments include the following: **death penalty, imprisonment with/without work, fine, penal detention, or petty fine**. The offender may be remitted in a certain case. Summary courts do not have jurisdiction to impose a punishment of imprisonment or a heavier penalty, except certain predesignated offenses, such as theft, for which the courts may impose a sentence of imprisonment with work for not more than three years.

Where a sentence is imprisonment with or without work for not more than three years or a fine of not more than 500,000 yen, an execution of the sentence can be fully or partially suspended (**suspension of execution of sentence**), and where it is deemed necessary, an offender may be placed under **probationary supervision** during a period of suspension.

Summary courts may order imposition of a fine of not more than one million yen or a petty fine (**summary order**) based on an examination of evidentiary documents (**summary proceeding**). Those subjected to a summary order may request a formal trial, and thereafter, a case will be tried in a public trial.

The defendant and public prosecutor may appeal a judgment of a court of first instance by a district court or a summary court to a **high court**, and subsequently, to the **Supreme Court**.

Section 1 Finalized Judgment

Table 2-3-1-1 shows the trend in the number of persons whose cases have been finalized by type of judgment.

Table 2-3-1-1 Persons whose cases have been finalized (by type of judgment)

(2012-2021)

Year	Total	Guilty											Not guilty	
		Death penalty	Life imprisonment with work	Imprisonment with work for a definite term			Imprisonment without work for a definite term			Fine	Penal detention	Petty fine		
				Partial suspension of execution of sentence	Full suspension of execution of sentence	Fully suspended execution rate	Full suspension of execution of sentence	Fully suspended execution rate						
2012	408,936	10	38	58,215	...	32,855	56.4	3,227	3,122	96.7	344,121	5	2,868	82

The General Secretariat, Supreme Court

3 Saiban-in trials

In *Saiban-in trials*, a panel consisting of three professional judges and six saiban-ins (lay judges chosen from the public for each case) (one professional judge and four saiban-ins, in exceptional cases) conducts deliberations to make a determination on fact finding, applications of laws and regulations and sentencing. In the deliberations, determinations are made by a majority opinion of the panel which must include opinions of both professional judge(s) and saiban-ins.

District courts handle the following cases through saiban-in trials: [1] cases involving offences punishable with the death penalty or life imprisonment, and [2] those involving crimes, subject to imprisonment for a minimum period of not less than one year, which caused a victim's death by intentional criminal acts. When a district court determines in consideration of behavior of a defendant, etc. that, [1] there is possibility that lives, bodies or property of saiban-ins, their family members or similar persons could be harmed, and [2] the possibility makes saiban-ins, etc. feel so threatened that it is difficult for saiban-ins to perform their duties, then, the court must render a ruling that such case is to be handled by a panel consisting of professional judges only. In 2021, the number of defendants whose cases were handled by a panel consisting of professional judges only was eight (Source: the General Secretariat, Supreme Court).

Table 2-3-2-3 shows the number of persons received or disposed by courts of first instance (including case transfers, etc.) by means of saiban-in trials by type of offense.

Table 2-3-2-3 Saiban-in trials: persons received/disposed by courts of first instance (by type of offense)

(2017-2021)

Category	Total	Homicide	Robbery causing death	Robbery causing injury	Rape at the scene of a robbery	Injury causing death	Rape causing death or injury	Forcible indecency causing death or injury	Dangerous driving causing death	Arson of inhabited buildings	Counterfeiting of currency	Firearms and Swords Control Act	Stimulants Control Act	Act on Special Provisions for Narcotics	Others
Persons received															
2017	1,122	278	19	253	21	96	69	90	18	105	24	16	102	2	29
2018	1,090	250	23	281	24	82	49	104	7	115	23	16	96	1	19
2019	1,133	255	21	222	18	71	55	77	16	100	25	7	252	1	13
2020	1,004	217	33	304	28	57	47	90	22	97	6	9	77	-	17
2021	793	220	12	136	25	82	47	69	25	87	15	5	28	-	42
Persons disposed															
2017	993	230	21	195	17	108	57	81	25	91	18	9	68	22	51
2018	1,038	247	17	203	19	109	63	85	13	100	9	10	98	30	35
2019	1,021	242	25	209	23	80	46	71	8	101	18	14	116	32	36
2020	933	197	11	202	13	44	44	68	14	84	8	2	190	22	34
2021	928	237	27	226	21	69	42	64	25	77	4	5	80	27	24

Notes: 1. Numbers include cases remanded from high courts.

2. "Persons received" refer to those charged with an offense designated for a *saiban-in* trial at the time of receipt. When a person is charged with multiple offenses designated for a saiban-in trial on one charging sheet, the person is counted under the offense with the severest statutory punishment.

3. "Persons disposed" refer to defendants tried in *saiban-in* trials (including numbers of persons of transferred cases but excluding those of persons whose cases are determined by courts to be excluded from saiban-in trials based on Article 3, paragraph (1) of the Act on Criminal Trials with the Participation of Saiban-in).

A convicted person (a person received a ruling of partial acquittal may be included) is included in offenses for which he/she is found guilty. A person without a conviction (including a person whose case is transferred) is counted in a categorized offence on the table above by which he/she is charged. These categorized offenses are designated for Saiban-in trials. If a person committed two or more offenses, the person is counted under the offense with the severest statutory punishment.

4. "Homicide" does not include offenses of inducing/aiding suicide nor homicide with consent.

5. "Dangerous driving causing death" refers to offenses provided in Article 2 of the Act on Fatal/Injurious Driving and offenses provided in Article 208-2 of the Penal Code prior to its amendment by Act No. 86 of 2013.

6. "Counterfeiting of currency" includes uttering counterfeit currencies.

7. "Others" indicate kidnapping for ransom, abandonment by a person responsible for protection causing death, violation of Explosives Control Act, etc. However, "others" of "persons disposed" may include offenses not designated for *saiban-in* trials.

Chapter 4 Institutional Correction of Offenders aged 20 or older

Penal Institutions consist of prisons, juvenile prisons, and detention houses. **Prisons** and **Juvenile Prisons** are mainly for holding sentenced inmates while **Detention Houses** are mainly for inmates awaiting a court's sentence. As of April 1, 2022, there were 73 main penal institutions (59 prisons including four rehabilitation program centers, six juvenile prisons, and eight detention houses) and 105 branch penal institutions (eight branch prisons and 97 branch detention houses).

Workhouses for fine defaulters are attached to all penal institutions and court-ordered confinement houses are attached to most penal institutions.

Section 1 Inmates in Penal Institutions

1 Number of inmates in penal institutions

Fig. 2-4-1-1 shows the trend in the number and rate per population of inmates in penal institutions as of the end of the respective years since 1946.

Fig. 2-4-1-1 Inmate population of penal institutions and rate per population at the end of the year

- Notes: 1. "Inmate population at the end of the year" refers to the number of inmates as of the end of the respective years.
 2. "Others" include inmates sentenced to death, fine defaulters in workhouses, detainees under warrants of arrest, detainees subject to court-ordered confinement, and juveniles temporarily committed for a protective measure.
 3. "Rate per population at the end of the year" refers to the inmate population per 100,000 general population at the end of the respective years.
 4. "Partial suspension of execution of sentence" has been counted since 2016, with the commencement of the partial suspension of execution of sentence system.

Source: Annual Report of Statistics on Correction
 The Statistics Bureau, Ministry of Internal Affairs and Communications (population data)

2 Number of newly sentenced inmates

Fig. 2-4-1-2 shows the trend in the number and rate per population of newly sentenced inmates admitted to penal institutions since 1946.

Fig. 2-4-1-2 Newly sentenced inmate population and rate per population

Note: "Rate per population" refers to the number of newly sentenced inmates per 100,000 general population. "Rate per population of females" refers to the number of newly sentenced female inmates per 100,000 general population of females.

Source: Annual Report of Statistics on Correction

The Statistics Bureau, Ministry of Internal Affairs and Communications (population data)

3 Characteristics of newly sentenced inmates

(1) Age

Fig. 2-4-1-3 shows the composition by age group and by male/female of newly sentenced inmates in 2021.

Fig. 2-4-1-3 Newly sentenced inmates: composition by age group (male/female)

Notes: 1. Numbers are based on the age at the time of imprisonment. Inmates sentenced to indeterminate sentences and aged 20 or older at the time of imprisonment, however, are counted by the age at the time of the judgment.

2. Numbers in parentheses indicate the actual number of persons.

Source: Annual Report of Statistics on Correction

(2) Types of offenses

Fig. 2-4-1-4 shows the composition by type of offense committed and by male/female of newly sentenced inmates in 2021.

Fig. 2-4-1-4 Newly sentenced inmates: composition by type of offense (male/female)

Notes: 1. "Embezzlement" includes embezzlement of lost property.

2. Numbers in parentheses indicate the actual number of persons.

Source: Annual Report of Statistics on Correction

Section 2 Treatment of Sentenced Inmates

The **Act on Penal Detention Facilities and the Treatment of Inmates and Detainees** (Act No. 50 of 2005) stipulates treatment of inmates, aiming to stimulate their motivation for reformation and rehabilitation and foster their ability to adapt to living in society, by addressing their sense of consciousness in accordance with their individual characteristics and circumstances, while simultaneously respecting their human rights.

1 Treatment indexes and treatment guidelines

The core of correctional treatment for sentenced inmates consists of work, guidance for reform and guidance in school courses. The contents and delivery of correctional treatment must be tailored to individual characteristics and circumstances of each sentenced inmate (**principle of individualized treatment**).

Each penal institution conducts an assessment of individual characteristics and circumstances of each sentenced inmate (**treatment assessment**), utilizing specialized knowledge and techniques, such as medicine, psychology, pedagogy and sociology. A detailed assessment is conducted at designated penal institutions (**assessment centers**) for newly sentenced inmates aged less than 26 and sentenced inmates who need a specific assessment to be enrolled in **special guidance for reform**.

Following the assessment (including an assessment at assessment centers) upon commencement of execution of a sentence, penal institutions designate one or more treatment indexes for each sentenced inmate. The **treatment indexes** take into account the types and contents of correctional treatment, and characteristics and criminal tendencies of sentenced inmates. **Table 2-4-2-1** shows the number of sentenced inmates as of the end of 2021 by their treatment index.

Table 2-4-2-1 Sentenced inmates by treatment index

[1] Types and content of correctional treatment

Type	Content		Code
Work	General work		V0
	Vocational training		V1
Guidance for reform	General guidance for reform		R0
	Special guidance for reform	Guidance on overcoming drug addiction	R1
		Guidance on withdrawal from organized crime group	R2
		Guidance on prevention of repeat sexual offenses	R3
		Education from victims' points of view	R4
		Traffic safety guidance	R5
	Employment support guidance	R6	
Guidance in school courses	Supplementary guidance in school courses		E1
	Special guidance in school courses		E2

[2] Characteristics and criminal tendencies of sentenced inmates

(as of the end of 2021)

Characteristics and criminal tendencies	Code	Number of persons
Persons sentenced to penal detention	D	1
Juveniles younger than 16 who need to be accommodated in juvenile training schools	Jt	-
Persons who have mental diseases or disabilities and therefore need to be accommodated in penal institutions where medical treatment is mainly provided	M	169
Persons who have physical diseases or disabilities and therefore need to be accommodated in penal institutions where medical treatment is mainly provided	P	283
Females	W	2,953
Foreign nationals who need different treatment from that for Japanese inmates	F	1,129
Persons sentenced to imprisonment without work	I	92
Juveniles who do not need to be accommodated in juvenile training schools	J	5
Persons whose term of imprisonment to be served is 10 years or more	L	4,226
Adults younger than 26, the correctional treatment of whom places priority on their plasticity	Y	1,591
Persons without advanced criminal tendencies	A	8,688
Persons with advanced criminal tendencies	B	15,530

Note: Inmates who are designated under more than one treatment index are counted under one code selected in order from the top in the table.
Source: Annual Report of Statistics on Correction

A **treatment guideline**, which indicates the goals, basic contents and methods of correctional treatment, is specified for each sentenced inmate in accordance with the result of a treatment assessment that takes place upon the commencement of execution of his/her sentence. Correctional treatment is implemented based on the treatment guidelines.

2 Work

Inmates sentenced to imprisonment with work are legally obliged to engage in **work**. Inmates sentenced to imprisonment without work or penal detention may work if they so request. The average daily number of inmates engaging in work was 37,035 in Fiscal Year 2021. As of March 31, 2022, 79.8 % of inmates sentenced to imprisonment without work engaged in work (Source: the Correction Bureau, Ministry of Justice).

In FY 2021, 56 vocational training subjects, such as business skills, welding, forklift operation, information processing technology, call center operating, handling of medicine/nursing care insurance, marketing strategy, etc. were available, with 10,957 inmates having completed the training and a total of 6,413 inmates having obtained qualifications or licenses to be welding technicians, boiler engineers, information processing engineers, etc. (Source: the Correction Bureau, Ministry of Justice).

3 Guidance for reform

Guidance for reform aims to enable sentenced inmates to become more aware of their responsibility for offenses they committed, foster a sound mind and body, and acquire knowledge and attitude needed in adapting to living in society. It consists of general and special guidance for reform.

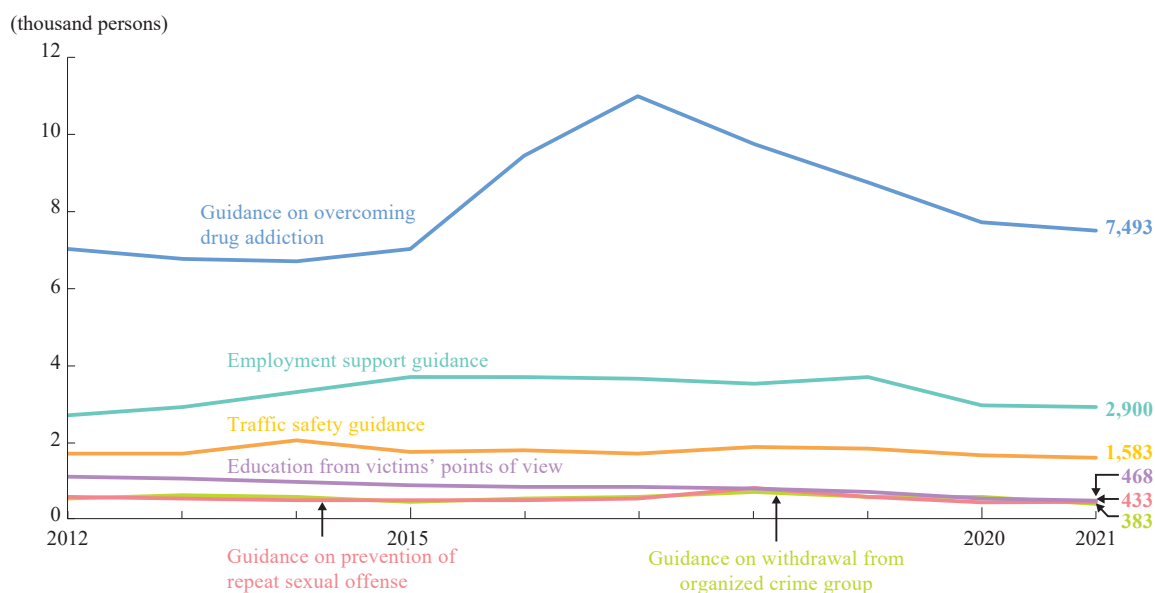

General guidance for reform is provided through lectures, gymnastics, events, interviews, consultation and advice, along with other methods, with the aim of helping sentenced inmates [1] understand their victims' feelings and develop a sense of remorse, [2] lead a regular life with a sound way of thinking, thereby promoting their own mental and physical health, and [3] prepare for returning to society by mapping out a new life while acquiring necessary skills to adapt to living in society, etc.

Special guidance for reform is provided to sentenced inmates who face difficulty in their reformation and rehabilitation or smooth reintegration into society due to special obstacles, such as drug dependency or membership in organized crime groups, with the priority of placing guidance on the obstacle.

Fig. 2-4-2-2 shows the trend in the number of sentenced inmates who were enrolled in special guidance for reform.

Fig. 2-4-2-2 Sentenced inmates enrolled in special guidance for reform

(FY 2012-2021)

Note: Numbers indicate the total number of inmates who were enrolled in special guidance for reform in the respective fiscal years.
Source: The Correction Bureau, Ministry of Justice

4 Guidance in school courses

Guidance in school courses is the equivalent of an academic education [1] for sentenced inmates who are considered likely to face difficulty in their reformation and rehabilitation or smooth reintegration into society due to lacking academic abilities necessary for living in society (supplementary guidance in school courses), and [2] for sentenced inmates for whom enhancing their academic abilities can make their reintegration into society especially smoother (special guidance in school courses).

The Certificate for Student Achieving the Proficiency Level of Upper Secondary School Graduate has been available in penal institutions through cooperation between the Ministry of Justice and the Ministry of Education, Culture, Sports, Science and Technology, and guidance on taking an examination is actively provided at four designated penal institutions. In FY 2021, 354 inmates took the examination, of whom 147 fully passed it and 200 passed for a part of its subjects (Source: the Education Policy Bureau, Ministry of Education, Culture, Sports, Science and Technology).

5 Employment support

In order to secure employment for inmates upon their release, the Ministry of Justice assigns employment support staff to penal institutions and juvenile training schools and, in cooperation with the Ministry of Health, Labour and Welfare, implements comprehensive employment support measures for released inmates.

6 Welfare support

In cooperation with the Ministry of Health, Labour and Welfare, the Ministry of Justice has been making **special adjustments** in correctional institutions and probation offices so that elderly inmates or inmates with disabilities who have no suitable place to return to can receive appropriate welfare services such as nursing care, medical care, and pension promptly after their release. This initiative requires effective cooperation with welfare-related organizations, etc., and is centered on **support centers for settlement** established by each prefecture under the Ministry of Health, Labour and Welfare's Community Settlement Promotion Project. Under this initiative, the support to the inmates is provided in cooperation between criminal justice agencies and welfare authorities.

Section 3 Administration of Penal Institutions

1 Penal institution visiting committee

Penal institution visiting committees, each of which consists of at most 10 external members appointed by the Minister of Justice, have been established at all of the penal institutions. The committees visit penal institutions and provide wardens of penal institutions with their opinions on the administration of the institutions.

2 Food supply, medical care and hygiene

Inmates are provided with food and drink (hot water and drink, etc.). The meal budget per inmate aged 20 or older per day was 528.5 yen in FY 2022 (Source: the Correction Bureau, Ministry of Justice).

Medical doctors and other medical specialists are allocated to penal institutions to engage in medical treatment and health-related work. Furthermore, four medical prisons have been established and nine prisons have been designated as institutions that give priority to medical treatment. Both medical equipment and medical specialists have been intensively assigned to the above 13 institutions.

3 Cooperation with private sector

Penal institutions request **volunteer visitors** to interview inmates and provide them with guidance and advice based on their professional knowledge and experience.

Based on personal wishes of inmates, penal institutions make efforts to enable them to participate in religious ceremonies and receive instruction by requesting **chaplains** (private religious volunteers) to provide religious ceremonies and instruction (mental relief through sutra recitation and lectures, etc.).

4 Security and safety

Table 2-4-3-1 shows the number of security incidents that occurred at penal institutions, including escape, killing and injury in 2021.

Table 2-4-3-1 Security incidents at penal institutions

(2021)

Total	Escape		Suicide	Killing of/injury to inmates	Death in the course of work	Accidental death	Fire accident	Others
	Number of cases	Number of persons						
15 (13)	-	-	13 (13)	2 (-)	-	-	-	-

Notes: 1. Security incidents excluding “escape” refer to the number of cases. Numbers in parentheses indicate the number of deaths due to the incidents at penal institutions.

2. “Killing of/injury to inmates” excludes the number of cases of injured persons diagnosed as completely cured within one month.

Source: The Correction Bureau, Ministry of Justice

Chapter 5 Rehabilitation Services

Organizations providing rehabilitation services include the following: the **National Offenders Rehabilitation Commission** (a council consisting of a chairperson and four members) in the Ministry of Justice; **Regional Parole Boards** (a council composed of not less than three but not more than 15 members) established within the jurisdiction of each high court; and **Probation Offices** established within the jurisdiction of each district court. The National Offenders Rehabilitation Commission has the authority to make a recommendation to the Minister of Justice to pardon a specific person while regional parole boards have the authority to decide whether parole should be granted or not, based on a recommendation made by a warden of a penal institution, etc. Probation offices engage in probation/parole supervision, adjustment of living conditions, urgent aftercare of discharged offenders, promotion of crime prevention activities, etc.

Section 1 Parole

Parole can be granted to inmates sentenced to imprisonment with or without work who demonstrate signs of substantial reformation and are expected to be reformed and rehabilitated. Inmates granted parole are provisionally released and placed under supervision during a period remaining on their sentence. Parole aims to prevent re-offending and facilitate their reformation, rehabilitation and smooth reintegration into society.

To be granted parole, it is necessary for inmates who were sentenced to imprisonment with or without work to have served one third of a definite term of imprisonment or 10 years for life imprisonment. Parole can be granted to inmates who meet the following criteria: [1] they have a sense of remorse and are willing to reform and rehabilitate themselves; [2] there is no risk of re-offending; [3] it is reasonable to place them under parole supervision for their own reformation and rehabilitation; and [4] public sentiment approves such decision.

1 Number of parolees

Fig. 2-5-1-1 shows the trend in the number of released sentenced inmates and the parole rate since 1949.

Fig. 2-5-1-1 Released sentenced inmates and parole rate

Note: "Inmates released upon completion of term of imprisonment with partial suspension of execution" and "parolees (imprisonment with partial suspension of execution)" have been counted since 2016, with the commencement of the partial suspension of execution of sentence system.
 Source: Annual Report of Statistics on Correction

2 Percentage of sentence served

Fig. 2-5-1-2 shows, in relation to inmates sentenced to imprisonment for a determinate term and granted parole, the trend in the composition by percentage of served term per that imposed by a sentence before release on parole in 1991, 2001, 2011 and 2017-2021, and the composition by percentage of served term per that imposed by a sentence before release on parole in 2021, by length of sentence term.

Fig. 2-5-1-2 Inmates sentenced to imprisonment for a determinate term and granted release on parole, by percentage of served term per that imposed by a sentence and by term of sentence

Notes: 1. Since 2016, with the commencement of the partial suspension of execution of sentence system, the total number of “inmates sentenced to imprisonment for a determinate term and granted release on parole” has included the number of such parolees granted partial suspension of the execution of their sentence.

2. The percentage of served term of a parolee granted partial suspension of execution is based on his/her term of imprisonment for which partial suspension of execution was not granted.

3. Numbers in parentheses indicate the actual number of persons under the respective categories.

Source: Annual Report of Statistics on Rehabilitation

Section 2 Probation/Parole Supervision

Part 2

Probation/parole supervision aims to prevent persons under probation/parole supervision from repeating offenses or delinquency and to facilitate their reformation and rehabilitation through leading positive lives in a community. Probation/parole supervision is implemented through cooperation between probation officers and volunteer probation officers (VPOs or *Hogoshi* in Japan). Probation officers and VPOs maintain contact with persons under probation/parole supervision through interviews in order to observe their lives in society, and provide them with any needed **instruction and supervision** to ensure that they can follow their conditions for probation/parole supervision. Probation officers and VPOs also provide persons under probation/parole supervision with **guidance and assistance** to secure residences and find jobs so they can become self-supporting.

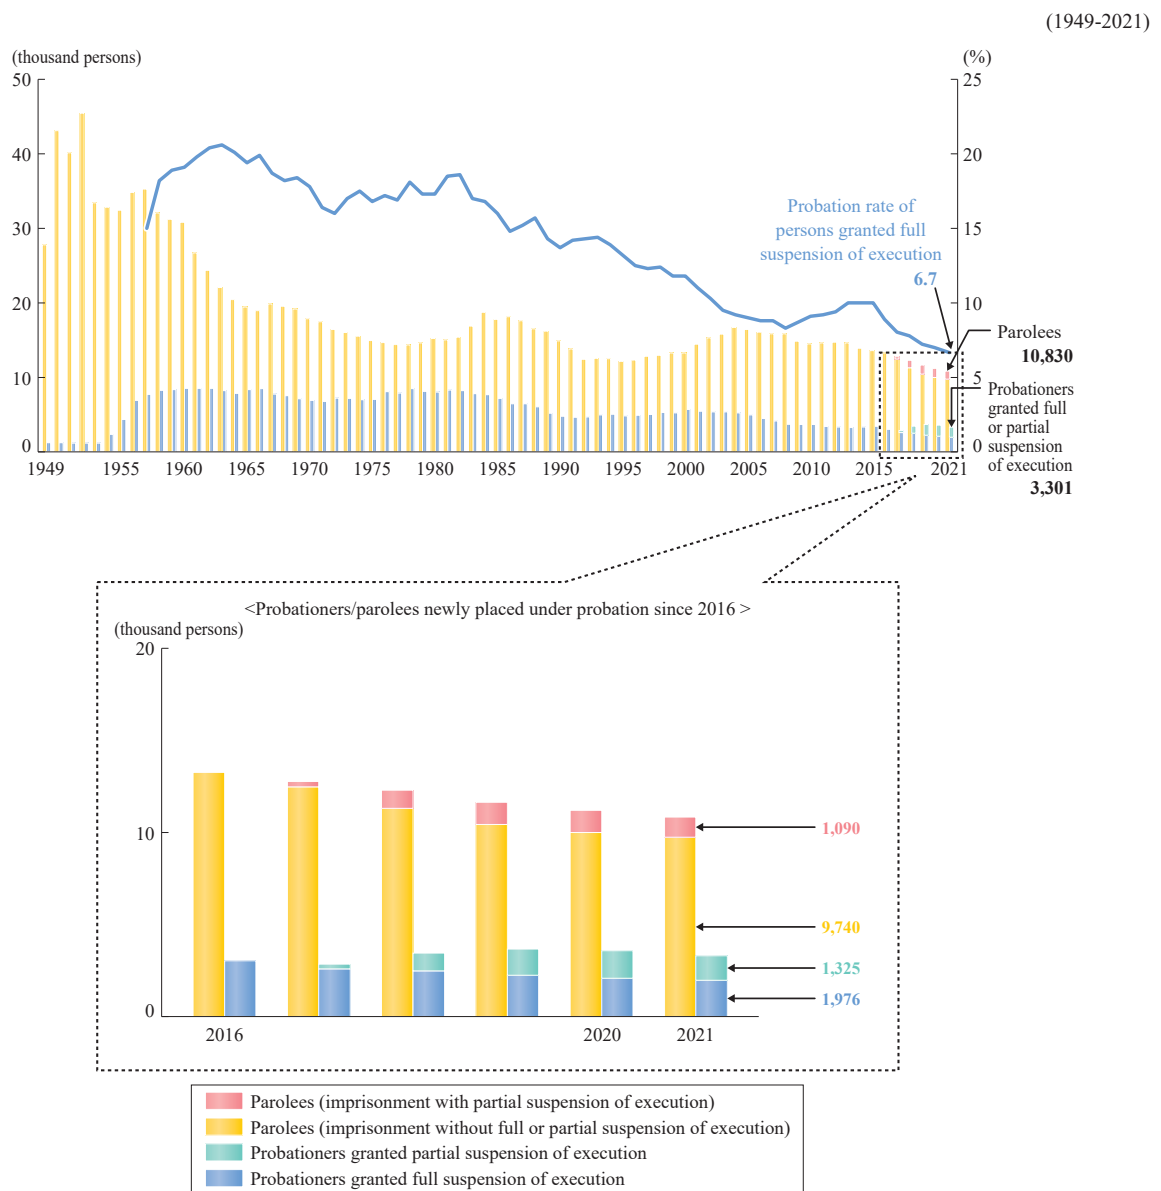

Persons under probation/parole supervision include [1] those placed under probation as a protective measure based on a decision made by a family court (**juvenile probationers**), [2] those granted parole from juvenile training schools and placed under parole supervision (**juvenile training school parolees**), [3] those granted parole from penal institutions and placed under parole supervision (**parolees**), [4] those granted full or partial suspension of execution of their sentence and placed under probation (**probationers**), and [5] those granted parole from a women's guidance home and placed under parole supervision (women's guidance home parolees).

1 Probationers/parolees

(1) Number of persons newly placed under probation/parole supervision

Fig. 2-5-2-1 shows the trend in the number of probationers/parolees newly placed under probation/parole supervision since 1949 and the trend in the probation rate among those granted full suspension of the execution of their sentence since 1957.

Fig. 2-5-2-1 Probationers/parolees newly placed under probation/parole supervision and probation rate

Notes: 1. Numbers for “probation rate of persons granted full suspension of execution” are presented from 1957 onward since, prior to 1957, the Annual Report of Statistics on Prosecution did not specify whether or not persons granted full suspension of execution were placed under probationary supervision.

2. “Parolees (imprisonment with partial suspension of execution)” and “probationers granted partial suspension of execution” have been counted since 2016, with the commencement of the partial suspension of execution of sentence system.

2 Treatment during probation/parole

(1) Implementation of assessment-based probation/parole supervision

A probation/parole supervision based on assessment utilizing CFP (Case Formulation in Probation/Parole) started in January 2021 to provide more effective guidance and support for probationers/parolees.

The CFP, which had been in a test phase since October 2018, is an assessment tool to collect and analyze data which help identify the risk of repeat offenses and an effective treatment plan.

According to the result of the analysis, the degree of involvement, frequency of contact, etc. of probation officers differ, and the officials create an individual treatment plan, which enhance the efficacy of guidance and support for probationers/parolees.

(2) Treatment in accordance with problems

Categorized treatment means to categorize problems and other characteristics of persons under probation/parole supervision according to their offenses/delinquency. And it aims to efficiently treat them by focusing on those problems so as to provide effective probation/parole supervision.

Table 2-5-2-4 shows the number of probationers/parolees by category in 2021.

Table 2-5-2-4 Number of probationers/parolees by treatment category

(as of the end of 2021)

Area	Category	Parolees (imprisonment without partial suspension of execution)	Parolees (imprisonment with partial suspension of execution)	Probationers granted full suspension of execution	Probationers granted partial suspension of execution
Relationship	Child abuse	19 (0.5)	-	112 (1.6)	2 (0.1)
	Spousal violence	16 (0.4)	-	105 (1.5)	12 (0.5)
	Family violence	16 (0.4)	1 (0.3)	111 (1.6)	6 (0.2)
	Stalking	7 (0.2)	-	194 (2.8)	3 (0.1)
Delinquent peers	Gangsters, etc.	51 (1.3)	6 (1.7)	44 (0.6)	84 (3.2)
	Motorcycle gangs	1 (0.0)	-	2 (0.0)	1 (0.0)
	Special fraud	521 (13.5)	-	230 (3.3)	2 (0.1)
Social adaptation	Difficulty in working	1,135 (29.4)	54 (15.5)	1,042 (14.9)	336 (12.9)
	School attendance	1 (0.0)	-	10 (0.1)	-
	Mental disorder	474 (12.3)	58 (16.7)	1,250 (17.9)	520 (19.9)
	Developmental disorder	21 (0.5)	4 (1.1)	182 (2.6)	13 (0.5)
	Intellectual disability	60 (1.6)	1 (0.3)	266 (3.8)	21 (0.8)
	Elderly	481 (12.5)	3 (0.9)	681 (9.8)	73 (2.8)
Addiction	Drugs	1,031 (26.7)	329 (94.5)	1,159 (16.6)	2,331 (89.4)
	Alcohol	410 (10.6)	10 (2.9)	708 (10.2)	151 (5.8)
	Sexual offences	237 (6.1)	6 (1.7)	1,044 (15.0)	47 (1.8)
	Gambling	476 (12.3)	11 (3.2)	385 (5.5)	51 (2.0)
	Kleptomania	136 (3.5)	1 (0.3)	327 (4.7)	9 (0.3)

Notes: 1. Persons categorized in multiple categories are counted in each category.

2. "Mental disorder" includes "developmental disorder" and "Intellectual disability."

3. Numbers in parentheses indicate the percentage of probationers/parolees categorized in each category among the total number of parolees (imprisonment without partial suspension of execution), parolees (imprisonment with partial suspension of execution), probationers granted full suspension of execution, and probationers granted partial suspension of execution (including those not categorized) as of the end of 2021.

Source: Annual Report of Statistics on Rehabilitation
The Rehabilitation Bureau, Ministry of Justice

Persons under probation/parole supervision who have specific criminal tendencies are provided in a systemized manner, as a part of instruction and supervision, with **specialized treatment programs**, which are built upon psychological and other expertise with cognitive behavioral therapy as a base theory.

Fig. 2-5-2-5 shows the trend in the number of probationers/parolees who participated in specialized treatment programs.

Fig. 2-5-2-5 Probationers/parolees in a specialized treatment program

(2012-2021)

[1] Sexual offender treatment program

[2] Drug abuse relapse prevention program

[3] Violence prevention program

[4] Drunk driving prevention program

■	Parolees (imprisonment with partial suspension of execution)	■	Probationers granted partial suspension of execution
■	Parolees (imprisonment without partial suspension of execution)	■	Probationers granted full suspension of execution

- Notes: 1. "Drug abuse relapse prevention program" from 2010 to May 2016 refers to "stimulant offender treatment program".
 2. "Parolees (imprisonment with partial suspension of execution)" and "probationers granted partial suspension of execution" have been counted since 2016, with the commencement of the partial suspension of execution of sentence system.
 3. Persons who had been granted partial suspension of execution of their imprisonment sentence and were released on parole and then placed under probation for suspended imprisonment after completion of their parole period are included in both "parolees (imprisonment with partial suspension of execution)" and "probationers granted partial suspension of execution".

Source: The Rehabilitation Bureau, Ministry of Justice

Section 3 Volunteer Probation Officers and Halfway Houses

1 Volunteer probation officers

VPOs are volunteers who support rehabilitation of offenders and delinquents in local communities. Commissioned by the Minister of Justice pursuant to the Volunteer Probation Officers Act (Act No. 204 of 1950), they implement probation/parole supervision and adjustment of living conditions in cooperation with probation officers, and engage in crime prevention activities, etc. in partnership with local governments.

VPOs are assigned to one of 886 probation districts (as of April 1, 2022) nationwide (Source: the Rehabilitation Bureau, Ministry of Justice). VPOs are part-time national public officials.

Fig. 2-5-3-1 shows the trend in the number of VPOs, their average age, and percentage of female VPOs.

Fig. 2-5-3-1 VPOs: number, percentage of females and average age

Note: Numbers are as of January 1 of the respective years.
Source: The Rehabilitation Bureau, Ministry of Justice

Fig. 2-5-3-2 shows the composition by age group and occupation of VPOs as of January 1, 2022.

(as of January 1, 2022)

[1] Age groups

[2] Occupation

Note: "Other" refers to those engaged in the real estate rental business, physicians, etc.
 Source: The Rehabilitation Bureau, Ministry of Justice

2 Halfway houses

Halfway houses are institutions that are commissioned, mainly by probation offices, to provide accommodation, meals, employment support, living guidance, etc. to persons under probation/parole supervision or those receiving urgent aftercare because of their difficulties in becoming independent due to lack of residence or person to rely on, and thus support their smooth reintegration into society. As of April 1, 2022, there were 103 halfway houses nationwide.

Fig. 2-5-3-3 shows the trend in the number of persons newly entrusted to halfway houses.

Fig. 2-5-3-3 Persons newly entrusted to halfway houses

(2002-2021)

Notes: 1. Numbers exclude persons whose category changed (e.g., a person entrusted to a house as a parolee but who remained at the house after the completion of the term of his/her sentence).

2. "Others" include juvenile probationers, juvenile training school parolees, probationers granted full suspension of execution of their sentence, women's guidance home parolees, those who have received a fully suspended sentence with probation but the judgment has not yet been finalized, those who have received a fully suspended sentence without probation, those whose prosecution has been suspended, etc.

3. "Parolees (imprisonment with partial suspension of execution)" and "inmates released upon completion of term of imprisonment with partial suspension of execution" have been counted since 2016, with the commencement of the partial suspension of execution of sentence system.

PART 3

Trends in Juvenile Delinquency and Treatment of Juvenile Delinquents

Curry and Rice with Spinach Grown by Parolees

Source: Rehabilitation Bureau, Ministry of Justice

In this Part, “juvenile delinquent” refers to juveniles subject to a family court hearing, which means [1] juvenile offenders (juveniles who have committed a crime (aged 14 to 19 at the time of the crime)), [2] juvenile offenders under 14 (juveniles under 14 years of age who have violated laws and regulations of a criminal nature), and [3] pre-delinquents (juveniles who are, in light of their personality or environment, likely to commit crimes or violate laws and regulations of a criminal nature in the future due to their propensity not to submit to legitimate supervision by a custodian or other reasons) (Article 3, paragraph (1) of the Juvenile Act (Act No. 168 of 1948)).

Chapter 1 Trends in Juvenile Delinquency

Section 1 Penal Code Offenses Committed by Juveniles

Fig. 3-1-1-1 [1] shows the trend in the number and rate per population of juveniles cleared (including juvenile offenders under 14 who received guidance from the police; hereinafter the same applies in this Section) for Penal Code offenses, dangerous driving causing death or injury, or negligent driving offenses causing death or injury since 1946. **Fig. 3-1-1-1** [2] shows a comparison between the trend in the number and rate per population of juveniles cleared for Penal Code offenses and those aged 20 or older cleared for Penal Code offenses since 1966.

Fig. 3-1-1-1 Penal Code offenses, dangerous driving causing death or injury, and negligent driving offenses causing death or injury: cleared juveniles and rate per population

[1] Penal Code offenses, dangerous driving causing death or injury, and negligent driving offenses causing death or injury (1946-2021)

[2] Penal Code offenses

(1966-2021)

- Notes:
1. Numbers are based on the age at the time of the offense. Those aged 20 or older at the time of clearance are counted as those aged 20 or older.
 2. Numbers include juvenile offenders under 14 who received guidance from the police.
 3. "Rate per population of juveniles" refers to the number of juveniles cleared per 100,000 population of juveniles aged 10 or older.
 4. "Rate per population of those aged 20 or older" refers to the number of those aged 20 or older cleared per 100,000 population of those aged 20 or older.
 5. Before 1966, "Penal Code Offenses" include (gross) negligence in pursuit of social activities causing death or injury not related to vehicle driving.
 6. The numbers for the years following 1970 in [1] do not include juvenile offenders under 14 for negligent driving offenses causing death or injury.

Table 3-1-1-2 shows the composition by type of offense committed by juveniles cleared for Penal Code offenses in 2021.

Table 3-1-1-2 Penal Code offenses committed by juveniles: cleared juveniles and percentage of juveniles (by type of offense and male/female)

(2021)

Offenses	Total		Males	Females	Percentage of juveniles	
					Percentage of females	
Total	20,930	(100.0)	17,296	3,634	17.4	11.6
Homicide	43	(0.2)	32	11	25.6	5.1
Robbery	238	(1.1)	221	17	7.1	16.3
Arson	58	(0.3)	46	12	20.7	10.3
Rape	170	(0.8)	168	2	1.2	13.4
Assault	1,362	(6.5)	1,209	153	11.2	5.5
Injury	1,933	(9.2)	1,751	182	9.4	10.9
Extortion	326	(1.6)	282	44	13.5	25.9
Theft	10,869	(51.9)	8,292	2,577	23.7	12.4
Fraud	1,028	(4.9)	859	169	16.4	9.9
Embezzlement	1,290	(6.2)	1,161	129	10.0	13.2
Embezzlement of lost property	1,270	(6.1)	1,143	127	10.0	14.3
Forcible indecency	444	(2.1)	437	7	1.6	14.4
Breaking into a residence	979	(4.7)	907	72	7.4	26.9
Damage to property	881	(4.2)	768	113	12.8	17.3
Others	1,309	(6.3)	1,163	146	11.2	9.9

- Notes: 1. Numbers are based on the age at the time of the offense.
 2. Numbers include juvenile offenders under 14 who received guidance from the police.
 3. "Embezzlement" includes embezzlement of lost property.
 4. Numbers in parentheses indicate the percentage of juveniles cleared for each offense among the total number of cleared juveniles.

Source: Criminal Statistics of the National Police Agency

Section 2 Special Acts Offenses Committed by Juveniles

Fig. 3-1-2-1 shows the trend in the number of juvenile offenders cleared for Special Acts offenses (excluding violations of four traffic-related Acts up to 2003 and traffic-related Acts since 2004) since 1956.

Fig. 3-1-2-1 Special Acts offenses: cleared juveniles

(1956-2021)

Notes: 1. Numbers are based on the age at the time of the offense.

2. Numbers exclude juvenile offenders under 14.

3. "Drug offenses" refer to violations of the Stimulants Control Act, the Cannabis Control Act, the Narcotics and Psychotropics Control Act, the Opium Control Act, and the Poisonous and Deleterious Substances Control Act.

4. Numbers exclude those cleared for violations of four traffic-related Acts up to 2003 and traffic-related Acts since 2004.

Chapter 2 Treatment of Juvenile Delinquents

Section 1 Overview

Fig. 3-2-1-1 shows the procedure for juvenile delinquents.

Fig. 3-2-1-1 Outline of treatment of juvenile delinquents

(2021)
(persons)

- Notes: 1. Numbers in “Public Prosecutors Offices” count the total number of juveniles in cases received by or referred from public prosecutors offices, thus a person received/referred twice for different cases is counted as two juveniles.
 2. “Referral to director of child consultation center, etc.” refers to referral to prefectural governors or directors of child consultation centers.
 3. “Referral to children’s self-reliance support facilities, etc.” refers to referral to children’s self-reliance support facilities or foster homes.
 4. The number of “released” from juvenile training schools is limited to discharge or release on parole.
 5. “Commencement of probation/parole supervision” is limited to juvenile probationers and juvenile training school parolees.
 6. The outline including numbers shows procedures prior to the enforcement of the Act Partially Amending the Juvenile Act and Related Acts (Act No. 47 of 2021).

 Annual Report of Statistics on Correction
 Annual Report of Statistics on Rehabilitation

1 The amended Juvenile Act

In May 2021, the Act Partially Amending the Juvenile Act and Related Acts (Act No. 47 of 2021) was enacted in order to take necessary measures in light of changes in the social situation, such as lowering the legal age of adulthood from 20 to 18 years, and the crimes committed by juveniles. The new Act came into effect on April 1, 2022. The Juvenile Act was amended to designate a juvenile aged 18 to 19 as a **specified juvenile**, and special provisions were established for juvenile protection cases for specified juveniles, including [1] a family court, in principle, shall refer a case to a public prosecutor, where a juvenile aged 18 or older at the time of the offense committed a crime punishable with the death penalty, life imprisonment, or imprisonment with or without work for a minimum term of one year or more; [2] a family court, when it does not refer a case to a public prosecutor, shall subject a specified juvenile to rehabilitation measures of 6 or 24 months of probation or commitment to a juvenile training school, when it is found necessary, and [3] a family court shall not subject a specified juvenile to rehabilitation measures against pre-delinquency.

2 Procedure before referral to family courts

(1) Juvenile offenders

When a judicial police official investigates a juvenile's case (excluding a specified juvenile's case) and considers that the juvenile has committed an offense, the official shall refer the case to a family court if it involves an offense that is only punishable with a fine or less severe penalty, or to a public prosecutor if it involves an offense that is punishable with a more severe penalty, unless the case concerns a violation of the Road Traffic Act and *Hansokukin* (administrative fine) was paid in accordance with the traffic infraction notification system. When a case is referred, a public prosecutor investigates the case and then refers it to a family court if the prosecutor considers that an offense has been committed or there are any other reasons to subject the case to a family court hearing.

Regarding a specified juvenile's case, when a judicial police official investigates the case and considers that the juvenile has committed an offense, the official shall refer the case to a public prosecutor even if it involves an offense that is only punishable with a fine or less severe penalty, excluding the case concerns a violation of the Road Traffic Act and *Hansokukin* was paid in the above mentioned system.

(2) Juvenile offenders under 14 and pre-delinquents

A family court may subject juvenile offenders under 14 and pre-delinquents of the same age to a hearing only when a prefectural governor or a child consultation center's director refers them to a family court.

Police officers may investigate a case when there is probable cause to suspect that a juvenile under 14 has committed an offense. The police shall refer the case to a director of a child consultation center if, as a result of the investigation, they consider that an act of the juvenile involved a specific serious offense.

When juvenile offenders under 14 violate laws or regulations involving specific serious offenses, a prefectural governor or a director of a child consultation center is required, in principle, to refer a case to a family court. A governor or a director shall also refer a juvenile to a family court if it is considered appropriate to refer the juvenile to a family court hearing.

3 Procedure in family courts

(1) Investigation by family courts

A family court is required to investigate any case referred to it. It can order a family court investigating officer to investigate a case.

(2) Assessment by juvenile classification homes

By a ruling, a family court may refer a juvenile to a juvenile classification home and request an assessment if it is necessary for a hearing. In such case, the juvenile is committed to a juvenile classification home, and the home assesses the juvenile based on knowledge and techniques it has in medicine, psychology, pedagogy, sociology and other expertise and conducts necessary observation and protection of the juvenile.

(3) Hearings in family courts

Based on the result of an investigation, a family court shall issue a ruling for commencement or non-commencement of a hearing or other proceeding.

A juvenile or his/her custodians can appoint an attendant, but they need permission of a family court to appoint someone other than an attorney at law as an attendant.

Hearings are closed to the public, but a family court may allow victims of certain serious cases to observe a hearing upon their request if the court finds it appropriate and unlikely to hinder sound development of a juvenile.

A family court may, by a ruling, have a public prosecutor participate in a hearing for a case concerning a juvenile offender involved in designated serious crimes when the court finds that participation of a public prosecutor in the hearing is necessary for fact-finding regarding delinquency. In such case, if the juvenile has no attendant who is an attorney at law, the court shall appoint one.

When it is found impossible or unnecessary to place a juvenile under protective measures as a result of a hearing, a family court shall issue a ruling not to subject the juvenile to protective measures. When it is found appropriate to take the measures prescribed in the Child Welfare Act (Act No. 164 of 1947), a family court shall refer a case to a prefectural governor or a child consultation center's director. When a person is found to be 20 years of age or older, a family court shall refer a case to a public prosecutor.

A family court shall, by a ruling, refer a case punishable by the death penalty or imprisonment to a public prosecutor if disposition of the case in criminal procedure is found appropriate as a result of an investigation or a hearing. If a juvenile was 16 years of age or older at the time of the offense and committed a crime which caused a victim's death by an intentional criminal act, or a juvenile was 18 years of age or older at the time of the offense and committed a crime punishable by the death penalty or imprisonment for a minimum period of not less than one year, a family court, in principle, needs to render a ruling to refer a case to a public prosecutor.

Except in the cases mentioned above, a family court shall, by a ruling, subject a juvenile to **protective measures**. Protective measures include placing the juvenile under probation by a probation office, and referring the juvenile to a children's self-reliance support facility, to a foster home (limited to juveniles younger than 18 years of age), or to a juvenile training school (generally limited to juveniles aged 12 or older).

A juvenile or his/her legal representative or attendant may lodge an appeal against a ruling imposing

protective measures only on the grounds of a violation of laws and regulations that affected the ruling, a serious error in fact-finding or substantial inappropriateness of the measures. In the case where a public prosecutor participated in a hearing by a ruling of a family court, the public prosecutor may file a request to a high court for acceptance of the case as the court of second instance only on the grounds of a violation of laws and regulations that affected the ruling or a serious error in fact-finding.

4 Procedure for protective measures

(1) Probation based on a decision of a family court

A juvenile placed under probation based on a decision of a family court receives instruction, supervision, guidance and assistance necessary for reformation/rehabilitation from a probation officer or a volunteer probation officer.

The probation period, in principle, continues until a juvenile turns 20 years of age, or for two years if he/she turns 20 within two years, or until he/she is discharged from the probation. On the other hand, a family court shall subject specified juveniles protective measures including 6-month probation and 2-year probation/juvenile training school under the amended Juvenile Act.

(2) Referral to children's self-reliance support facilities or foster homes

Juveniles committed to children's self-reliance support facilities/foster homes are accommodated in these facilities/homes established in accordance with the Child Welfare Act, which are open to children in need of aid.

(3) Referral to juvenile training schools and parole supervision after release on parole

A juvenile training school mainly holds juveniles referred by family courts and provides them with correctional education, support for reintegration into society and other treatment, for the purpose of fostering sound cultivation of juveniles.

A period of commitment to a juvenile training school can, in principle, last until a juvenile turns 20 years of age, but a superintendent of a juvenile training school may extend it for a period not exceeding one year from the date of the referral. A juvenile in a juvenile training school is to be released upon completion of his/her period of commitment, but in certain cases, his/her commitment may be extended based on a decision of a family court until he/she turns 23 or 26 years of age. A period of commitment to a juvenile training school for specified juveniles is three years or less.

On the other hand, a juvenile in a juvenile training school may be released on parole before completion of his/her period of commitment based on a decision of a Regional Parole Board. When released on parole, a juvenile is placed under parole supervision.

Section 2 Prosecution/Courts

1 Investigation by public prosecutors (before referral to family courts)

Fig. 3-2-2-1 shows the composition by age group of the types of offenses committed by juvenile offenders newly received by public prosecutors in 2021.

Fig. 3-2-2-1 Juvenile offenders received by public prosecutors: composition by type of offense (by age group)

Notes: 1. Numbers are based on the age at the time of reception.
 2. "Embezzlement" includes embezzlement of lost property.
 3. Numbers in parentheses indicate the actual number of persons.

Section 3 Juvenile Classification Homes

1 Overview of juvenile classification homes

Juvenile classification homes have the following duties: [1] to conduct an assessment of juveniles based on professional knowledge and skills, [2] to conduct observation and protection of juveniles committed to the homes based on their characteristics and in consideration of their sound development, and [3] to provide advice and support in a local community in order to prevent crime and delinquency.

As of April 1, 2022, there were 52 juvenile classification homes nationwide (including eight branch homes).

2 Juveniles newly committed to juvenile classification homes

Fig. 3-2-3-1 shows the trend in the number of juveniles newly committed to juvenile classification homes (the commitment may be as a measure for observation and protection of juveniles, a measure in place of detention, or for other reasons) by male/female and the percentage of females.

Part
3

Fig. 3-2-3-1 Juveniles newly committed to juvenile classification homes (male/female) and percentage of females

Note: "Juveniles newly committed to juvenile classification homes" exclude juveniles who were returned after escaping, transferred from another institution, and provisionally committed.

Source: Annual Report of Statistics on Correction

Section 4 Juvenile Training Schools

As of April, 2022, there were 47 juvenile training schools nationwide (including six branch schools).

1 Juveniles newly committed to juvenile training schools

(1) Number of juveniles newly committed to juvenile training schools

Fig. 3-2-4-1 shows the trend in the number of juveniles newly committed to juvenile training schools by male/female and the percentage of females since 1949.

B. Types of delinquency

Fig. 3-2-4-3 shows the composition by type of delinquency committed by juveniles newly committed to juvenile training schools in 2021, by male/female and age group.

Fig. 3-2-4-3 Juveniles newly committed to juvenile training schools: composition by type of delinquency (by age group, by male/female)

(2021)

[1] Males

[2] Females

Notes: 1. Numbers are based on the age at the time of commitment. "Junior juveniles" include those younger than 14 years old and "senior juveniles" include those who had turned 20 years old at the time of commitment.

2. Numbers in parentheses indicate the actual number of juveniles.

Source: Annual Report of Statistics on Correction

2 Treatment provided in juvenile training schools

The Act Partially Amending the Juvenile Act and Related Acts (Act No. 47 of 2022) amended the Juvenile Training School Act, which added a new class (Class 5) of juvenile training schools on April 1, 2022.

(1) Classes of juvenile training schools and correctional education curriculum

Juvenile training schools fall under the following five classes and each juvenile training school accommodates, according to the designated class, the following persons categorized based on age, level of criminal tendency, mental and/or physical condition, etc.:

- (i) Class 1 Persons who are subject to execution of protective measures (excluding those categorized as (v). The same applies to (ii) and (iii).) and do not have serious physical or mental disorders and are about 12 years of age or older but younger than 23 years of age (excluding those categorized as (ii));
- (ii) Class 2 Persons who are subject to execution of protective measures and whose criminal tendency is more serious, who do not have serious physical or mental disorders and who are about 16 years of age or older but younger than 23 years of age;
- (iii) Class 3 Persons who are subject to execution of protective measures and have any serious physical or mental disorder and are about 12 years of age or older but younger than 26 years of age;
- (iv) Class 4 Persons who are subject to execution of their sentence at juvenile training schools; and
- (v) Class 5 Specified juveniles under two-year probation who failed to comply with the probation rules to be observed, and who are referred to a juvenile training school by a family court because the failure was so serious that the educational and supervisory measures of probation were not sufficient to improve or rehabilitate them.

Correctional education curriculums are designated for each juvenile training school to conduct correctional education in a systematic and organized manner. A correctional education curriculum is determined according to [1] types of inmates who fall under certain common characteristics in light of their age, their condition of mental and physical disorder and degree of criminal tendencies of them, [2] necessary ability for adapting themselves to living in society and [3] other circumstances. Correctional education curriculums refer to focused contents and standard periods of correctional education provided for inmates.

(2) Correctional education

The centerpiece of treatment in juvenile training schools is correctional education. Inmates are provided with five fields of guidance: lifestyle guidance, vocational guidance, guidance in school courses, physical guidance and special activities guidance. A superintendent of a juvenile training school shall decide an education guideline, which indicates the goals, basic contents, methods, and period of correctional education, in accordance with the characteristics of the juveniles.

Section 5 Probation/Parole Supervision for Juveniles

1 Juvenile probationers and juvenile training school parolees

Fig. 3-2-5-1 shows the trend in the number of juvenile probationers and juvenile training school parolees newly placed under probation/parole supervision.

Fig. 3-2-5-1 Juveniles newly placed under probation/parole supervision

(1972-2021)

Note: Numbers for “short-term probation for traffic offenses” and “short-term probation” have been respectively counted since 1977 and 1994 with the commencement of each measure.

Part
3

2 Treatment for juvenile probationers and juvenile training school parolees

(1) Categorized treatment

Categorized treatment is conducted for juvenile probationers and juvenile training school parolees, as well. **Table 3-2-5-2** shows the number of juvenile probationers and juvenile training school parolees by major treatment category as of the end of 2021.

Table 3-2-5-2 Juvenile probationers/juvenile training school parolees by treatment category

(as of the end of 2021)

Area	Category	Juvenile probationers		Juvenile training school parolees	
Relationship	Child abuse	4	(0.1)	-	
	Spousal violence offenders	34	(0.5)	3	(0.2)
	Family violence	110	(1.5)	55	(3.1)
	Stalking	44	(0.6)	5	(0.3)
Delinquent peers	Gangsters, etc.	16	(0.2)	22	(1.2)
	Motorcycle gangs	278	(3.8)	89	(5.0)
	Special fraud	276	(3.8)	144	(8.0)
Social adaptation	Difficulty in working	643	(8.8)	423	(23.5)
	School attendance	1,178	(16.1)	151	(8.4)
	Junior high school students	239	(3.3)	15	(0.8)
	Mental disorder	848	(11.6)	440	(24.5)
	Developmental disorder	525	(7.2)	257	(14.3)
	Intellectual disability	279	(3.8)	157	(8.7)
Addiction	Drugs	686	(9.4)	267	(14.9)
	Alcohol	173	(2.4)	84	(4.7)
	Sexual offences	663	(9.1)	217	(12.1)
	Gambling	36	(0.5)	24	(1.3)
	Kleptomania	23	(0.3)	3	(0.2)

Notes: 1. Persons categorized in multiple categories are counted in each category.
 2. "Junior high school students" is included in "school attendance".
 3. "Mental disorder" includes "developmental disorder" and "Intellectual disability."
 4. Numbers in parentheses indicate the percentage of juveniles categorized in each treatment category among the total number of juvenile probationers (excluding those placed on short-term probation for traffic offenses and short-term probation) and juvenile training school parolees (including those not categorized) as of the end of 2021.

Source: Annual Report of Statistics on Rehabilitation
 The Rehabilitation Bureau, Ministry of Justice

(2) Specialized treatment programs

If the director of a probation office finds it necessary for appropriately providing instructions and supervision based on the delinquency juvenile probationers and juvenile training school parolees committed and other factors, the director may impose a specialized treatment program mandate on those juveniles.

Chapter 3 Criminal Procedure for Juveniles

A public prosecutor must, in principle, institute prosecution of a case referred to him/her by a family court if the prosecutor considers that there is sufficient suspicion to institute prosecution.

Criminal procedure for prosecuted juveniles is basically the same as that for those aged 20 or older. A court, however, shall, by a ruling, transfer a case to a family court if it is found appropriate to subject a juvenile defendant to protective measures as a result of examination of facts.

If a juvenile is to be punished with imprisonment with or without work for a definite term, the juvenile must be given a sentence with the minimum and the maximum imprisonment terms determined within the limit stipulated by statute (indeterminate sentence; the minimum and maximum terms cannot exceed 10 and 15 years, respectively) unless execution of the sentence is suspended.

If a person who is under 18 at the time of committing an offense is to be punished with the death penalty, life imprisonment shall be imposed. If a person who is under 18 at the time of committing an offense is to be punished with life imprisonment, imprisonment with or without work for a definite term may be imposed. In this case, the term of imprisonment imposed shall be neither less than 10 years nor more than 20 years.

3 Offenses related to new psychoactive substance

Table 4-2-1-4 shows the trend in the number of persons cleared (limited to those cleared by the police) for offenses related to **New Psychoactive Substances** (substances produced to have chemical structure and pharmacological effects similar to controlled substances (stimulants, cannabis, narcotics and psychotropics, opium and opium poppies) or designated substances (designation under Article 2, Paragraph (15) of the Act on Securing Quality, Efficacy and Safety of Products Including Pharmaceuticals and Medical Devices (Act No. 145 of 1960)); they include substances falsely presented as not containing controlled/designated substances), by type of law and regulation.

Table 4-2-1-4 New psychoactive substances: cleared persons by type of regulation

(2017-2021)

Applied regulations	2017	2018	2019	2020	2021
Total	651	396	182	150	145
Pharmaceuticals and Medical Devices Act (Pharmaceutical Affairs Act)	578	346	165	131	111
Narcotics and Psychotropics Control Act	56	48	17	19	34
Traffic offenses	1	1	-	-	-
Others	16	1	-	-	-

Notes: 1. Numbers do not include persons cleared by officials of law enforcement agencies other than the police.

2. Persons cleared for more than one offense are counted only for the most severe offense.

3. "New psychoactive substances (NPSs)" refer to substances produced to have chemical structure and pharmacological effects similar to controlled substances (stimulants, cannabis, narcotics/psychotropics, opium and opium poppies) or designated substances (designation under Article 2, paragraph (15) of the Act on Securing Quality, Efficacy and Safety of Products Including Pharmaceuticals and Medical Devices (Act No. 145 of 1960; hereinafter referred to as "Pharmaceuticals and Medical Devices Act").

They include substances falsely presented as not containing controlled/designated substances.

4. "Pharmaceuticals and Medical Devices Act (Pharmaceutical Affairs Act)" accounts for the offenses only if designated substances are detected from the NPSs relevant to the offense.

5. "Narcotics and Psychotropics Control Act" accounts for the offenses only if narcotics are detected from the NPSs relevant to the offense.

6. "Traffic offenses" refer to offenses of dangerous driving causing death or injury, negligent driving offenses causing death or injury and violations of the Road Traffic Act.

7. "Others" refer to violations of the Stimulants Control Act, abandonment by a person responsible for protection causing death related to NPSs, prefectural ordinances on drug abuse prevention, violations of the Pharmaceuticals and Medical Devices Act that are not related to designated substances.

8. "Traffic offenses" and "others" include cases related to substances that had yet to be designated at the time of the offense but were designated after the clearance of the offense.

Chapter 5 Cybercrime

Fig. 4-5-1 shows the trend in the number of cleared cases of cybercrimes (violations of the **Act on Prohibition of Unauthorized Computer Access** (Act No. 128 of 1999), offenses involving computers or electromagnetic records, and other offenses using computer networks as vital tools of the crime).

Fig. 4-5-1 Cybercrime: cleared cases

Notes: 1. "Offenses involving computers or electromagnetic records" refer to unauthorized creation or damaging of electromagnetic records (including unauthorized creation of electromagnetic records of payment cards), obstruction of business by damaging a computer, computer fraud and offenses provided in Part II, Chapter XIX-2 of the Penal Code.

2. "Other cybercrime" includes cybercrime among offenses such as fraud, the violation of the Act against Child Prostitution and Pornography, and youth protection ordinances.

Source: Cyber Affairs Bureau, National Police Agency

Table 4-5-2 shows the trend in the number of cleared cases for offenses involving computers or electromagnetic records (unauthorized creation or damaging of electromagnetic records, obstruction of business by damaging a computer, computer fraud, and creation of unauthorized commands for electromagnetic records, etc.), violation of the Act on Prohibition of Unauthorized Computer Access, etc.

Table 4-5-2 Offenses involving computers or electromagnetic records, etc.: cleared cases

(2017-2021)

Year	Offenses involving computers or electromagnetic records	Unauthorized creation or damaging of electromagnetic records	Obstruction of business by damaging a computer	Computer fraud	Creation of unauthorized commands for electromagnetic records, etc.	Offenses related to electromagnetic records of payment cards	Unauthorized Computer Access Act
2017	355	39	13	228	75	579	648
2018	349	84	9	188	68	405	564
2019	436	83	12	325	16	286	816
2020	563	15	17	511	20	91	609
2021	729	14	13	692	10	61	429

Notes: 1. "Unauthorized creation or damaging of electromagnetic records" includes cleared cases of the unauthorized creation of electromagnetic records of payment cards which are also part of numbers for "offenses related to electromagnetic records of payment cards".

2. "Creation of unauthorized commands for electromagnetic records, etc." refers to offenses provided in Part II, Chapter XIX-2 of the Penal Code.

Source: Criminal Statistics of the National Police Agency

Cyber Affairs Bureau, National Police Agency

Table 4-5-3 shows the trend in the number of cleared cases for cybercrimes other than violations of the Act on Prohibition of Unauthorized Computer Access Act and offenses involving computers or electromagnetic records such as fraud, violations of the **Act on Regulation and Punishment of Acts Relating to Child Prostitution and Child Pornography, and the Protection of Children** (Act No. 52 of 1999; hereinafter referred to as “**Act against Child Prostitution and Pornography**”), and other offenses using computer networks as vital tools of the crime.

Table 4-5-3 Other cybercrime: cleared cases (by type of offense)

Category	(2017-2021)				
	2017	2018	2019	2020	2021
Total	8,011	8,127	8,267	8,703	11,051
Fraud	1,084	972	977	1,297	3,457
Internet auction fraud	212
Intimidation	376	310	349	408	387
Defamation	223	240	230	291	315
Distribution of obscene objects	769	793	792	803	859
Act against Child Prostitution and Pornography	2,225	2,057	2,281	2,015	2,009
Child prostitution	793	672	706	577	544
Child pornography	1,432	1,385	1,575	1,438	1,465
Youth Protection Ordinances	858	926	1,038	1,013	952
Trademark Act	302	375	327	306	344
Copyright Act	398	691	451	363	...
Anti-Stalking Act	323	269	325	347	325
Others	1,453	1,494	1,497	1,860	2,403

Notes: 1. “Internet auction fraud” is also included in “fraud” and counted in the years when statistical materials are available.

2. “Others” include violations of the Copyright Act (only in 2021), the Act on Prevention of Transfer of Criminal Proceeds, and the Anti-Prostitution Act.

Source: Cyber Affairs Bureau, National Police Agency

Chapter 6 Child Abuse, Spousal Offenses and Stalking-related Crimes

Section 1 Child Abuse

Fig. 4-6-1-1 shows the trend in the number of cleared cases and cleared persons for child abuse cases (cases cleared for “child abuse” defined in Article 2 of the Act on the Prevention, etc. of Child Abuse (Act No. 82 of 2000)), by type of offense.

Fig. 4-6-1-1 Child abuse: cases/persons cleared by type of offense

(2003-2021)

- Notes:
1. Numbers are based on data in and after 2003 for which statistical materials are available.
 2. “Homicide” includes murder suicide and offenses committed by a person immediately after giving birth.
 3. “Abandonment by a person responsible for protection” and “causing death or injury through gross negligence” include offenses committed by a person immediately after giving birth.
 4. “Injury” and “assault” do not include offenses that aggravate the punishment as prescribed in the Act on Punishment of Physical Violence and Others.
 5. “Others” include kidnapping of minors, and violations of the Child Welfare Act and the Act against Child Prostitution and Pornography.

Source: The Community Safety Bureau, National Police Agency

Part
4

Section 2 Spousal Offenses

Fig. 4-6-2-1 shows the trend in the number of cleared cases for spousal offenses since 2010.

Fig. 4-6-2-1 Domestic violence: cleared cases by type of offense

(2010-2021)

[1] Act on the Prevention of Spousal Violence (limited to violation of protection order)

[2] Other laws

Notes: 1. “Act on the Prevention of Spousal Violence (limited to violation of protection order)” accounts for every case cleared for violations of protection orders under the provision of the Act on the Prevention of Spousal Violence when a person was cleared for other offenses as well and it is not the offense with the heaviest statutory penalty.

2. “Other laws” account for cases cleared for Penal Code offenses and Special Acts offenses excluding violations of the Act on the Prevention of Spousal Violence. When a person was cleared for multiple offenses, the person is only counted in the offense with the heaviest statutory penalty.

3. “Injury”, “assault”, “intimidation” and “damage to property” do not include offenses that aggravate the punishment as prescribed in the Act on Punishment of Physical Violence and Others.

4. “Others” include obstruction of performance of public duty, arson, etc.

Source: The Community Safety Bureau, National Police Agency

Section 3 Stalking-related Crimes

Fig. 4-6-3-1 shows the trend in the number of cleared cases for stalking-related offenses by type of offense.

Fig. 4-6-3-1 Stalking: cleared cases by type of offense

(2004-2021)

- Notes:
1. Numbers are based on data in and after 2004 for which statistical materials are available.
 2. The “Anti-Stalking Act” accounts for every case cleared for violations of the Anti-Stalking Act, even when a person was cleared for other offenses as well and it is not the offense with the heaviest statutory penalty.
 3. “Cases cleared for other violations” account for cases cleared for Penal Code offenses and Special Acts offenses excluding Anti-Stalking Act violations. When a person was cleared for multiple offenses, the person is only counted in the offense with the heaviest statutory penalty.
 4. “Injury”, “assault”, “intimidation” and “damage to property” do not include offenses that aggravate the punishment as prescribed in the Act on Punishment of Physical Violence and Others.
 5. “Others” include violations of anti-nuisance ordinance, theft, forcible indecency, violations of the Firearms and Swords Control Act, etc.

Chapter 10 Offenses by Those with Mental Disorders

Section 1 Trends in Offenses

Table 4-10-1-1 shows the number of persons with mental disorders or suspected mental disorders cleared for Penal Code offenses in 2021 and the percentage thereof among the total number of persons cleared for Penal Code offenses by type of offense.

Table 4-10-1-1 Penal Code offenses by persons with mental disorders, etc.: cleared persons by type of offense

(2021)

Category	Total	Homicide	Robbery	Arson	Rape/ forcible indecenty	Injury/ assault	Intimidation	Theft	Fraud	Others
Total cleared persons (A)	175,041	848	1,460	534	4,154	41,518	2,964	84,360	10,400	28,803
Persons with mental disorders, etc. (B)	1,254	54	10	61	26	391	58	265	23	366
Persons with mental disorders	941	38	7	48	19	305	37	180	18	289
Persons suspected to have mental disorders	313	16	3	13	7	86	21	85	5	77
B/A (%)	0.7	6.4	0.7	11.4	0.6	0.9	2.0	0.3	0.2	1.3

Note: "Persons with mental disorders, etc." refer to "persons with mental disorders" (persons with schizophrenia, acute intoxication or addiction to psychoactive substances, intellectual disabilities, personality disorders, or other mental disorders, who are diagnosed by a designated psychiatrist as a person to be subject to medical treatment or protection) or "persons suspected to have mental disorders" (persons to be notified to a prefectural governor under Article 23 of the Act on Mental Health and Welfare of Persons with Mental Disorders (Act No. 123 of 1950) other than persons with mental disorders).

Source: Criminal Statistics of the National Police Agency

Section 2 Medical Care and Treatment System for Mentally Ill

The medical care and treatment system for the mentally ill covers, [1] a person who has committed a designated act (arson, forcible indecency, rape, homicide and robbery, including attempting to commit these offenses, and injury) but a public prosecutor has decided not to prosecute the person for reason of insanity or diminished capacity at the time of the act, and [2] a person who was either sentenced not guilty on the grounds of insanity or received a mitigated sentence on the grounds of diminished capacity at the time of the designated act (excluding a person who was sentenced to imprisonment without full-suspension of execution), and whose judgment has been finalized.

A hearing for both [1] and [2] will be held by a panel, consisting of a judge and a mental health expert (psychiatrist), in a district court, basically in response to an application by a prosecutor, which determines necessity and contents of medical treatment in accordance with the **Act on Medical Care and Treatment for Persons Who Have Serious Cases Under the Condition of Insanity** (Act No. 110 of 2003). At a hearing, the panel may request a director of a probation office to research living conditions of those persons.

Table 4-10-2-1 shows the trend in the number of persons for whom public prosecutors applied for a hearing and the number of persons whose cases were conclusively disposed at the hearing, and those numbers by type of designated act in 2021.

Table 4-10-2-1 Persons for whom public prosecutors applied for a hearing and whose cases were disposed at district court hearings (by type of designated act)

(2021)

Type of designated acts	Persons for whom public prosecutors applied for a hearing				Dispositions at district court hearings							
	Total	Non-prosecution	Finalized judgments		Total	Decision to hospitalize	Decision for outpatient care	Decision not to provide medical treatment	Rejection		Withdrawal	Rejection due to illegal application
			Not guilty	Full suspension of execution of sentence					Not found to have committed the designated act	Not recognized as an insane person, etc.		
Total	310	290	3	17	308	237	24	37	-	9	1	-
Arson	90	88	-	2	92	71	10	8	-	3	-	-
Rape	14	13	-	1	11	6	1	2	-	2	-	-
Homicide	84	73	1	10	79	59	8	11	-	-	1	-
Injury	115	109	2	4	120	95	5	16	-	4	-	-
Robbery	7	7	-	-	6	6	-	-	-	-	-	-

Notes: 1. "Designated acts" are to come under the respective articles of the Penal Code (Cf. Article 2, paragraph (1) of the Act on Medical Care for Persons with No or Diminished Capacity).

2. "Arson" refers to arson of inhabited buildings, arson of uninhabited buildings, and setting fire to objects other than structures (excluding preparation for such acts), but does not include obstruction of firefighting.

3. "Rape" includes forcible indecency.

4. "Homicide" does not include preparation for homicide.

5. "Injury" does not include incitement of injury.

6. "Robbery" refers to robbery and constructive robbery (excluding preparation for these acts), but does not include robbery by causing unconsciousness.

7. "Full suspension of execution of sentence" includes those who are sentenced to imprisonment without full suspension of execution but, in effect, have no term to serve.

8. Persons who committed multiple designated acts are accounted for based on the act with the heaviest statutory penalty. If those acts have equivalent penalties, then the person is accounted for based on the act listed first in the column of "type of designated acts".

Source: Annual Report of Judicial Statistics

The Criminal Affairs Bureau, Ministry of Justice

The General Secretariat, Supreme Court

Those for whom it is decided at a hearing that there is a need for hospitalization are hospitalized in designated inpatient care hospitals (designated by the Minister of Health, Labour and Welfare. As of April 1, 2022, there were 34 designated inpatient care hospitals nationwide (Source: Social Welfare and War Victims' Relief Bureau, Ministry of Health, Labour and Welfare).) where they receive specialized medical care in accordance with the system.

The managers of designated inpatient care hospitals are required to apply for a confirmation every six months of the need for subject persons to be hospitalized. They are also required to apply for discharge of subject persons from the hospitals immediately after it is deemed no longer necessary for them to be hospitalized to receive medical care.

Those who receive a decision by a panel on their need for outpatient treatment or permission to be discharged from a hospital must then receive outpatient medical care at a designated outpatient care hospital (designated by the Minister of Health, Labour and Welfare. As of April 1, 2022, there were 3,972 designated outpatient care hospitals nationwide (Source: Social Welfare and War Victims' Relief Bureau, Ministry of Health, Labour and Welfare).) for three years, in principle, and are placed under mental health supervision by probation offices during the period, which aims to secure continuous medical care.

Chapter 11 Offenses by Public Officials

Table 4-11-1 shows the number of persons received and conclusively disposed by public prosecutors for bribes in 2021.

Table 4-11-1 Acceptance of bribes: persons received/disposed by public prosecutors

(2021)

Category	Newly received			Conclusive dispositions							
	Total	Referred from judicial police officers	Others (initiative of public prosecutors, in response to a complaint, etc.)	Total	Prosecuted	Prosecuted for public trial	Request for summary order	Not prosecuted	Suspension of prosecution	Others	Referral to family court
Total	49	46	3	48	38	38	-	10	-	10	-
Members of the Diet	-	-	-	1	1	1	-	-	-	-	-
Members of the assembly of local public entities	3	3	-	3	3	3	-	-	-	-	-
National public employee	7	6	1	7	6	6	-	1	-	1	-
Local public employee	36	34	2	34	25	25	-	9	-	9	-
Persons deemed as public service personnel	3	3	-	3	3	3	-	-	-	-	-

Notes: 1. Numbers include any offense of “acceptance of bribes”.

2. “Local public employee” includes the governor of local public entities.

3. Every police official, including those employed by the national Government, is included in “local public employee”.

4. “Persons deemed as public service personnel” are persons deemed to be personnel engaged in public service pursuant to laws and regulations.

Chapter 1 Cleared Offenders

Fig. 5-1-1 shows the trend in the number of repeat offenders (those who had previously been cleared for an offense excluding violations of the Road Traffic Act and were cleared again) cleared for Penal Code offenses and the **percentage of repeat offenders** (the percentage of repeat offenders among the total number of cleared persons for Penal Code offenses).

Fig. 5-1-1 Penal Code offenses: repeat offenders among cleared persons, and percentage of repeat offenders

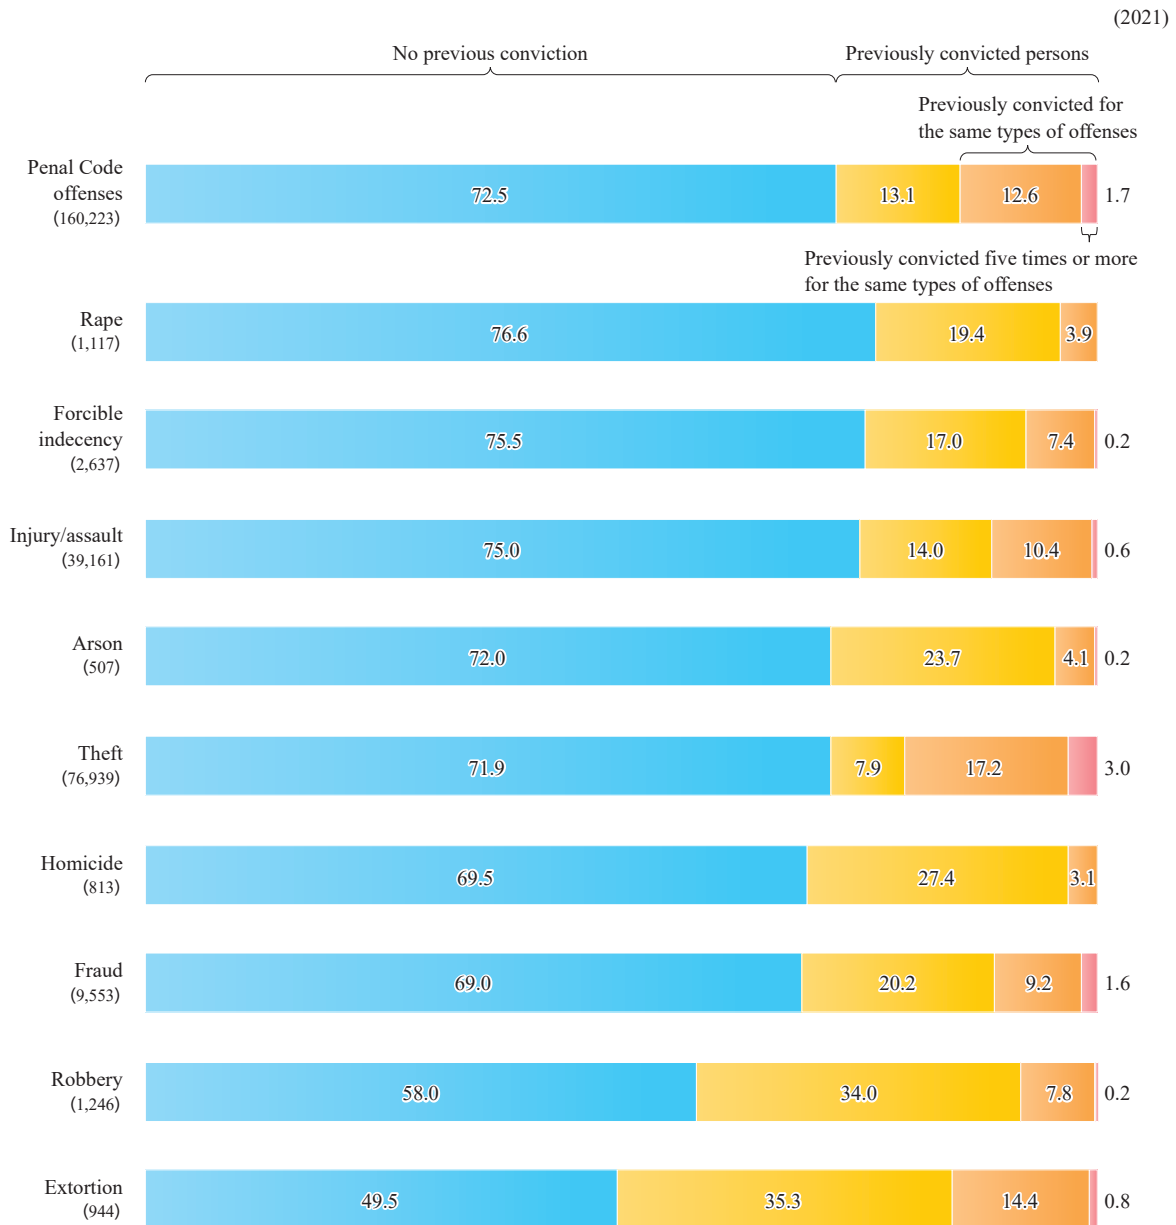

Notes: 1. "Repeat offenders" refer to those who had previously been cleared for an offense other than Road Traffic Act violations and were cleared again for a Penal Code offense.

2. "Percentage of repeat offenders" refers to the percentage of repeat offenders among persons cleared for Penal Code offenses.

Source: Criminal Statistics of the National Police Agency

Fig. 5-1-2 shows the composition by person with or without a previous conviction among cleared persons aged 20 or older for Penal Code offenses, by type of offense in 2021.

Fig. 5-1-2 Penal Code offenses: composition of cleared persons aged 20 or older by with/without previous convictions (by type of offense)

- Notes: 1. Numbers are based on the age at the time of clearance.
 2. "Previously convicted persons" refer to persons who have previously been convicted for an offense other than Road Traffic Act violations.
 3. "Previously convicted for the same types of offenses" refers to persons who have previously been convicted for the same types of offenses.
 "Previously convicted five times or more for the same types of offenses" refers to those who have previously been convicted five times or more for the same types of offenses.
 4. Numbers in parentheses indicate the actual number of persons cleared for the types of offenses.

Source: Criminal Statistics of the National Police Agency

Chapter 2 Prosecution

Table 5-2-1 shows the number of persons prosecuted in 2021 (excluding those prosecuted for negligent driving causing death or injury or road traffic-related violations) who had a previous conviction (the penalty for the previous conviction was a fine or heavier) and the percentage thereof among the total number of prosecuted persons, by type of offense for which they were prosecuted.

Table 5-2-1 The number and percentage of previously convicted persons among persons prosecuted (by type of offense)

(2021)

Offenses	Prosecuted persons	Previously convicted persons	Previous conviction				Percentage of previously convicted persons
			Imprisonment with/without work			Fines	
			Imprisonment without suspension of execution	Imprisonment with partial suspension of execution	Imprisonment with full suspension of execution		
Total	101,778	44,583	18,767	111	12,743	12,962	43.8
Penal Code offenses	62,390	28,388	11,791	18	8,459	8,120	45.5

Cannabis Control Act	3,688	1,133	315	4	558	256	30.7
Narcotics and Psychotropics Control Act	713	220	95	-	98	27	30.9
Stimulants Control Act	9,507	7,337	4,989	81	1,849	418	77.2
Poisonous and Deleterious Substances Control Act	156	123	61	-	31	31	78.8
Others	22,358	6,329	1,215	8	1,486	3,620	28.3

Notes: 1. Numbers exclude juridical persons, persons prosecuted for negligent driving offenses causing death or injury and road traffic-related violations, and offenders whose records are not clear about their previous convictions.

2. "Previously convicted persons" refer to persons with previous convictions for which a fine or heavier penalty was imposed.

3. "Percentage of previously convicted persons" refers to the percentage of previously convicted persons among persons prosecuted.

4. Offenders with multiple previous convictions are counted under the first offense to be selected according to the following order: "imprisonment without suspension of execution", "imprisonment with partial suspension of execution", "imprisonment with full suspension of execution", and "fines".

5. "Embezzlement" includes embezzlement of lost property.

Chapter 3 Correction

Section 1 Reimprisoned Inmates

Fig. 5-3-1-1 shows the trend in the number and percentage of reimprisoned inmates (the percentage of reimprisoned inmates among the total number of newly sentenced inmates) by total/female inmates.

Fig. 5-3-1-1 Reimprisoned inmates among newly sentenced inmates, and percentage of reimprisoned inmates (total/female)

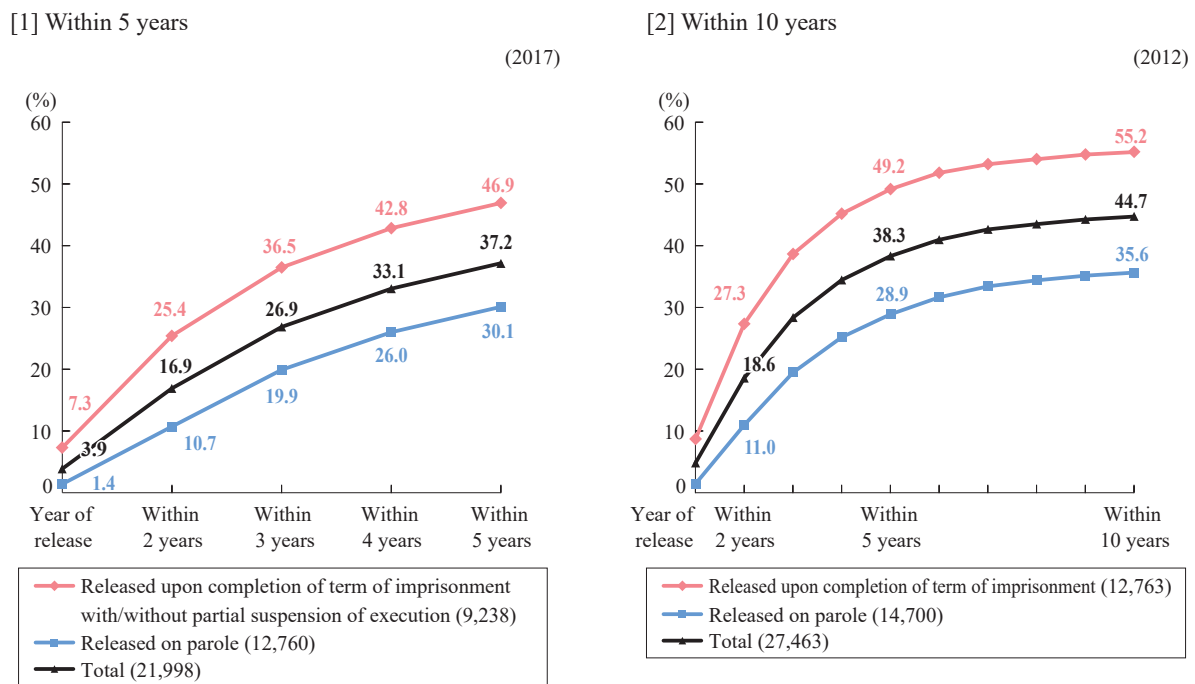

Source: Annual Report of Statistics on Correction

Section 2 Reimprisonment of Released Sentenced Inmates

In this Section, the **rate of reimprisonment** means the percentage of inmates reimprisoned to serve sentences for offenses committed after release among the released sentenced inmates of a given year.

Fig. 5-3-2-1 shows the rate of reimprisonment within the period of five and 10 years after the release of sentenced inmates released in [1] 2017 and [2] 2012 by reason for the previous release (either released upon completion of the term or released on parole; hereinafter the same applies in this Section).

Fig. 5-3-2-1 Rate of reimprisonment of released sentenced inmates by reason for previous release

Notes: 1. Numbers count inmates released upon completion of their term with/without partial suspension of execution or on parole and then reimprisoned for offenses committed after release.

2. "Rate of reimprisonment" is the percentage of persons released from a prison in 2017 for [1] or 2012 for [2] and reimprisoned by the year-end of 2021 for an offense committed after release among the total number of sentenced inmates released in 2017 or 2012.

Source: The Judicial System Department, Minister's Secretariat, Ministry of Justice

Fig. 5-3-2-2 shows the rate of reimprisonment within the period of five and 10 years after the release of sentenced inmates released in [1] 2017 and [2] 2012, by the number of time(s) the sentenced inmate had been imprisoned at the point of previous imprisonment.

Fig. 5-3-2-2 Rate of reimprisonment of released sentenced inmates by number of time(s) imprisoned

[1] Within 5 years

(2017)

[2] Within 10 years

(2012)

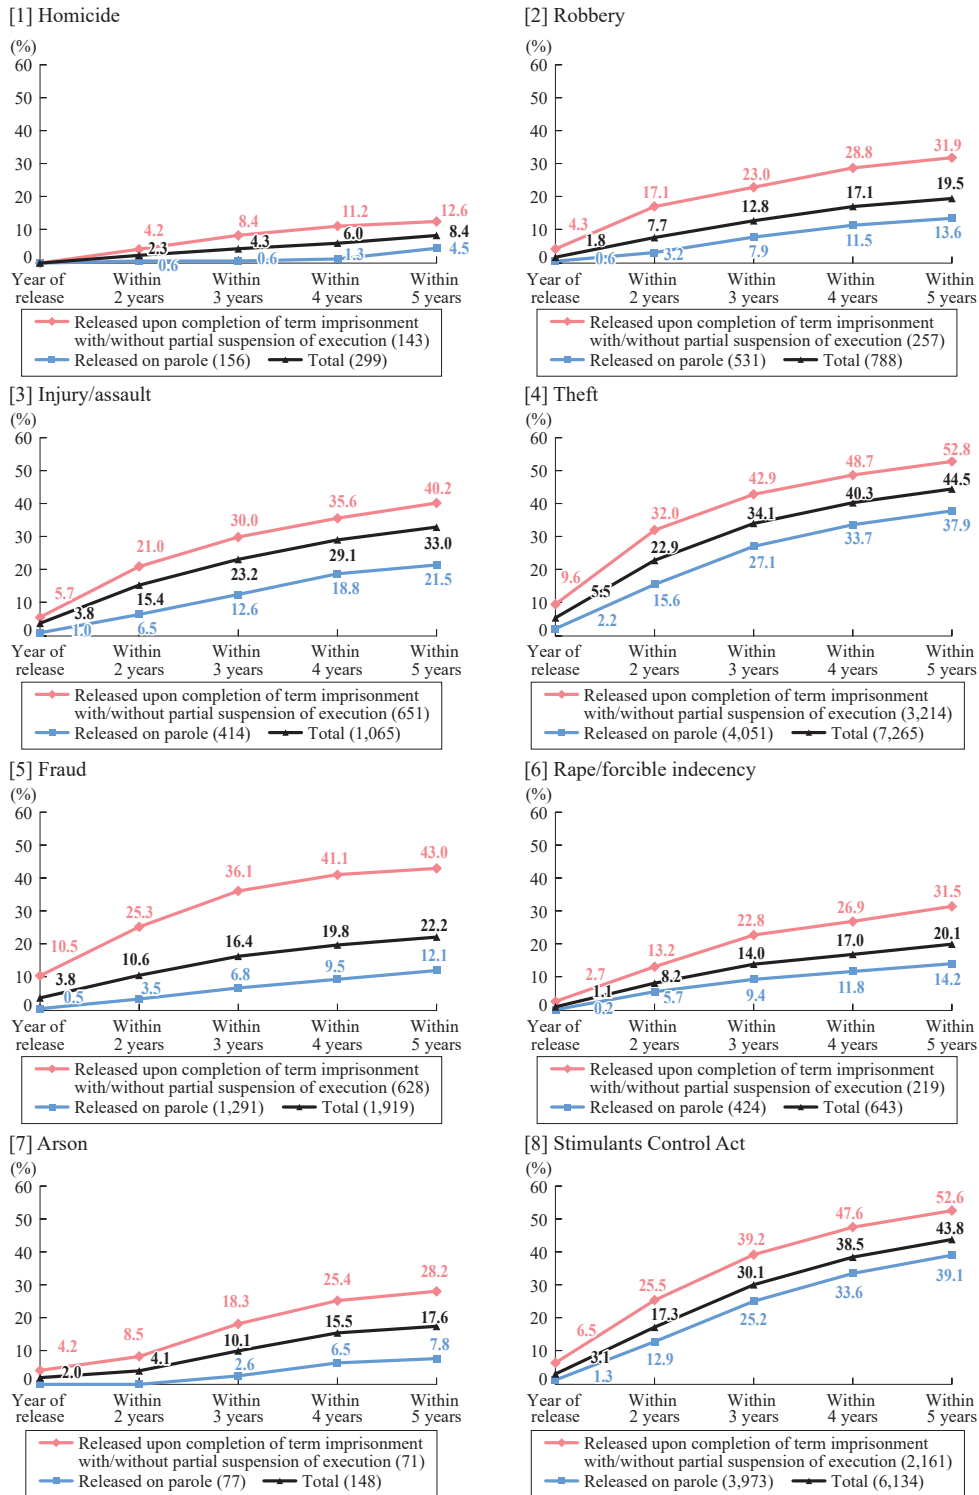

Note: See Notes and Source 5-3-2-1

Fig. 5-3-2-3 shows the rate of reimprisonment within the period of five years after the release of sentenced inmates released in 2017, by reason for the previous release and type of offense.

Fig. 5-3-2-3 Rate of reimprisonment of released sentenced inmates within five years after release by reason for the previous release (by type of offense)

(2017)

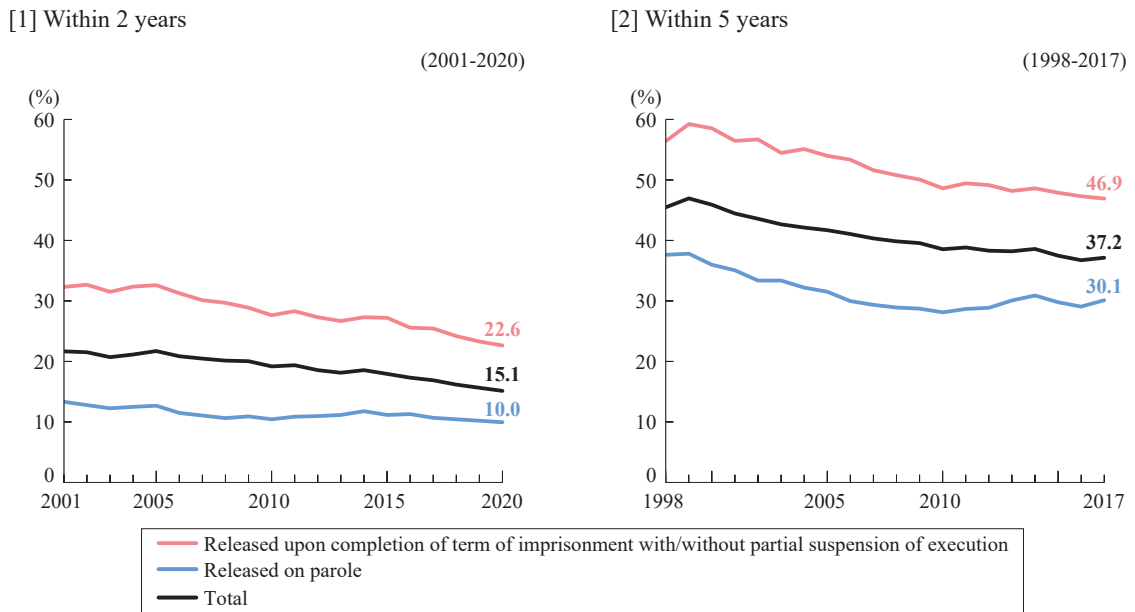

Notes: 1. See Notes 1 and Source of Fig. 5-3-2-1.

2. "Rate of reimprisonment within five years after release" is the percentage of persons released from a prison in 2017 and reimprisoned by the year-end of 2021 for an offense committed after release among the total number of released sentenced inmates in 2017.

3. Among homicide offenders who were released in 2017, no one was reimprisoned by the end of the year. Among arson offenders who were released on parole in 2017, no one was reimprisoned by the end of 2018.

Fig. 5-3-2-4 shows the trend in the rate of reimprisonment within the period of [1] two years and [2] five years after release, by reason for the previous release.

Fig. 5-3-2-4 Rate of reimprisonment of released sentenced inmates by reason for previous release

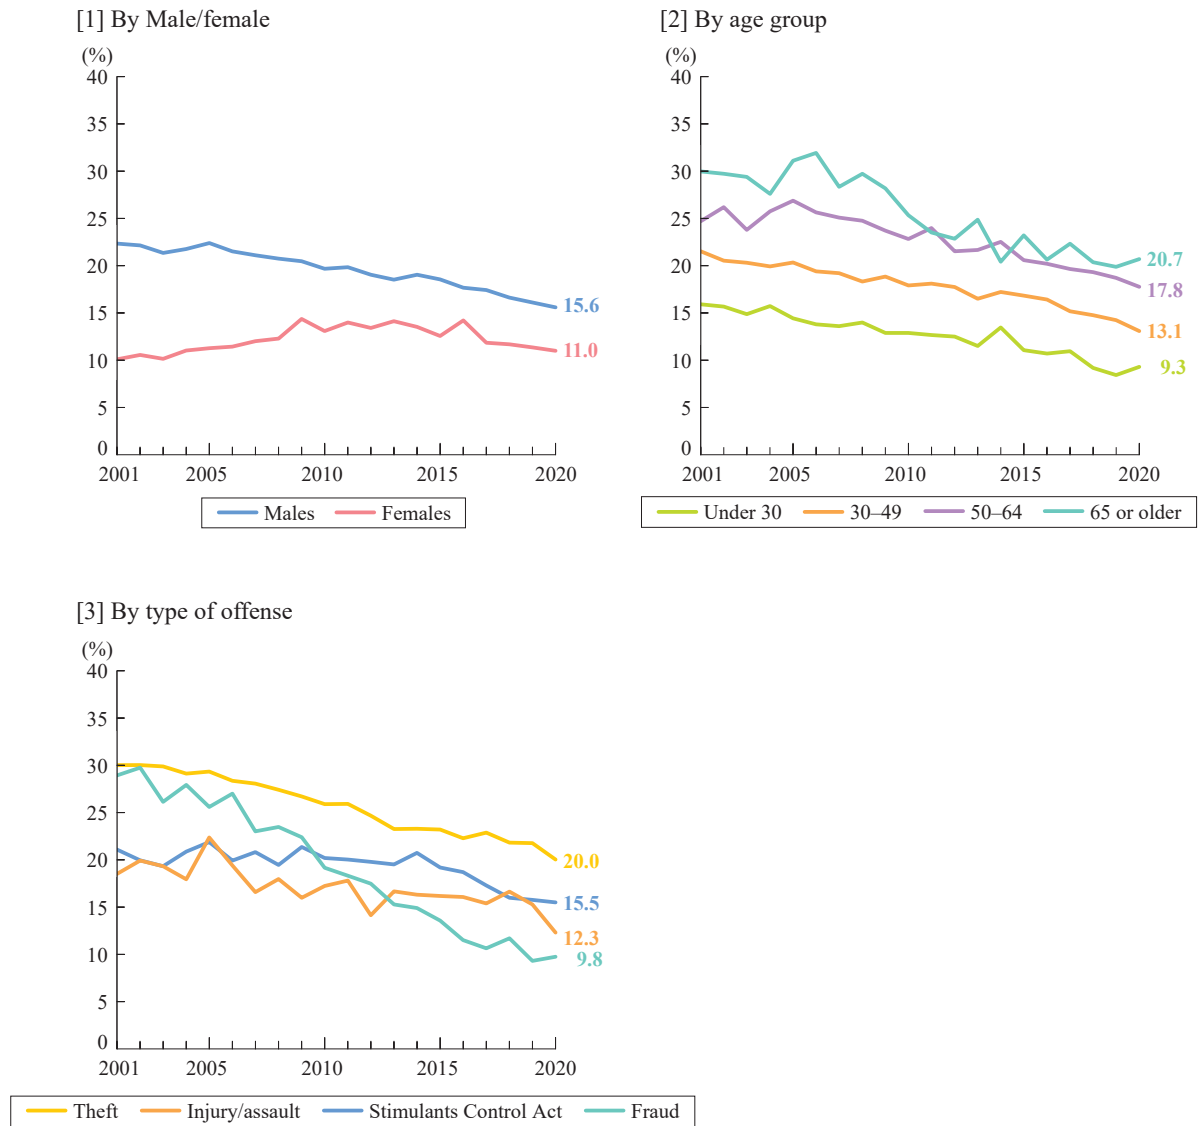

Notes: 1. Numbers count inmates released upon completion of their term of imprisonment with/without partial suspension of execution or released on parole and then reimprisoned for offenses after release.
 2. "Rate of reimprisonment" is the percentage of persons who were reimprisoned by the year-end of the second (next) year for [1] and the fifth year for [2] after their release, among the total number of released sentenced inmates of respective years.

Source: The Judicial System Department, Minister's Secretariat, Ministry of Justice

Fig. 5-3-2-5 shows the trend in the rate of reimprisonment within the period of two years after release during the years of 2001 -2020, [1] by male/female, [2] by age group and [3] by type of offense.

Fig. 5-3-2-5 Rate of reimprisonment of released sentenced inmates within two years after release, by male/female, age group, and type of offense

(2001-2020)

Notes: 1. See Notes 1 and Source of Fig. 5-3-2-4.

2. "Rate of reimprisonment within two years after release" is the percentage of persons reimprisoned by the year-end of the second year from the year of release for an offense committed after release among the total number of released sentenced inmates of respective years of release.

3. [2] is based on the age at the time of previous release, which is estimated from the age at the time of reimprisonment and the interval from the previous release as recorded.

Chapter 4 Probation/Parole Supervision

Section 1 Probationers and Parolees with Previous Convictions

Fig. 5-4-1-1 shows the trend in the number and percentage of previously convicted persons (refers to those with previous convictions for which a fine or heavier punishment was imposed) among the number of probationers/parolees newly placed under probation/parole supervision.

Fig. 5-4-1-1 Probationers/parolees newly placed under probation/parole supervision by with/without previous convictions and percentage of previously convicted persons

(2002-2021)

[1] Parolees

A. Parolees (imprisonment without suspension of execution)

B. Parolees (imprisonment with partial suspension of execution)

Part
5

[2] Probationers granted full/partial suspension of execution

A. Probationers granted full suspension of execution

B. Probationers granted partial suspension of execution

- Notes: 1. "Previously convicted persons" refer to persons with previous convictions for which a fine or heavier punishment was imposed.
 2. "Percentage of previously convicted persons" refers to the percentage of previously convicted persons among the total number of probationers/parolees newly placed under probation/parole supervision.
 3. Numbers exclude parolees/probationers whose records are not clear about their previous convictions.
 4. Offenders with multiple previous convictions and whose every previous conviction had been penalized with fines are counted under "previous convictions with fine". If any of the previous convictions had been penalized with imprisonment without full suspension of the execution of their sentence, they are counted as "previous convictions with imprisonment without full suspension of execution". Others with multiple previous convictions are counted under "previous convictions with imprisonment with full suspension of execution".
 5. There were no parolees (imprisonment with partial suspension of execution) and probationers granted partial suspension of execution in 2016 following the commencement of the partial suspension of execution of sentence system.

Source: Annual Report of Statistics on Rehabilitation
 The Judicial System Department, Minister's Secretariat, Ministry of Justice

Section 2 Redisposition or Revocation during Probation/Parole Supervision

Fig. 5-4-2-1 shows the trend in three types concerning rates of probationers and parolees whose supervision period terminated during the years of 2002-2021: [1] **redisposition rate** (the percentage of those who committed an offense during their probation/parole supervision period and were subjected to criminal dispositions for the offense (including suspension of prosecution; for those who received a sentence, the number is limited to those whose sentence was finalized during their probation/parole supervision period) among the total number of probationers/parolees whose probation/parole supervision terminated in the respective years), [2] **revocation rate** (the percentage of those whose full-suspension of execution of their sentence or parole was revoked due to either a violation of their conditions for probation/parole supervision or re-offending), and [3] **revocation/redisposition rate** (the percentage of those who fall under either redisposition or revocation; a person falling under both categories is counted as one person).

Fig. 5-4-2-1 Redisposition/revocation rate of probationers/parolees

(2002-2021)

- Notes: 1. "Redisposition rate" refers to the percentage of those who committed an offense during their probation/parole supervision period and were subjected to criminal dispositions for the offense (including suspension of prosecution; for those who received a sentence, the number is limited to those whose sentence was finalized during their probation/parole supervision period) among the total number of probationers/parolees whose probation/parole supervision terminated in the respective years.
2. "Revocation rate" refers to the percentage of probationers/parolees whose full suspension of the execution of their sentence or parole was revoked due to either a violation of their conditions for probation/parole supervision or re-offending, among the total number of probationers/parolees whose probation/parole supervision terminated in the respective years.
3. "Revocation/redisposition rate" refers to the percentage of probationers/parolees whose full suspension of the execution of their sentence or parole was revoked due to either a violation of their conditions for probation/parole supervision or re-offending, or those who committed an offense during their probation/parole supervision period and were subjected to criminal dispositions for the offense (including suspension of prosecution; for those who received a sentence, the number is limited to those whose sentence was finalized during their probation/parole supervision period) (persons falling under both categories are counted as one person) among the total number of probationers/parolees whose probation/parole supervision terminated in the respective years.

Chapter 1 Crime Victimization

Section 1 Number of Cases Involving Human Victims

Fig. 6-1-1-1 shows the trend in the number of reported cases of Penal Code offenses involving human victims and the victimization rate (number of reported cases involving human victims per 100,000 population) by male/female.

Fig. 6-1-1-1 Penal Code offenses involving human victims: reported cases and victimization rate (male/female)

- Notes: 1. Numbers exclude cases where the victim was juridical persons or any other form of organizations.
 2. "Victimization rate" refers to the number of reported cases per 100,000 population (male/female).
 3. The count is based on the main victim if multiple victims were involved in a case.

Source: Criminal Statistics of the National Police Agency
 The Statistics Bureau, Ministry of Internal Affairs and Communications (population data)

Section 2 Relationship between Victims and Suspects

Fig. 6-1-2-1 shows the composition by relationship between victims and suspects in cases cleared in 2021 (excluding cases where an investigation confirmed that an act in question did not constitute a crime or that legal conditions for prosecution or punishment were not satisfied), by type of offense.

Fig. 6-1-2-1 Penal Code offenses: composition by relationship between victims and suspects in cleared cases (by type of offense)

Notes: 1. Numbers exclude cases where the investigation confirmed that the act in question did not constitute a crime or that the legal conditions for prosecution or punishment were not satisfied.

2. "Others" consist of cases where victims were juridical persons or other types of organizations, or there was no victim. "Others" in "homicide" consist of cases of preparation for homicide.

3. Numbers in parentheses indicate the actual number of cleared cases.

Source: Criminal Statistics of the National Police Agency

Chapter 2 Victims in the Criminal Justice Process

Under the **victim participation system**, a court may allow a victim or others, by its ruling, to participate in proceedings of a case, to appear on trial dates, to state an opinion relating to procedural action by a prosecutor, to examine witnesses with regard to particulars relating to circumstances, to ask a defendant questions for the purpose of stating an opinion, and to state an opinion on fact-finding or application of law.

Table 6-2-1 shows the status of victim participation in trials at courts of first instance.

Table 6-2-1 Victim participation at the courts of first instance

(2017-2021)

Year	Victim participation		Witness examination	Questioning the accused	Closing statements/ recommendation of punishment	Shielding	Accompanying person	Entrustment to attorneys	Court-appointed attorneys
2017	1,380	(333)	196	560	667	276	115	1,060	553
2018	1,485	(363)	221	605	698	362	149	1,184	649
2019	1,466	(320)	204	623	723	318	106	1,157	602
2020	1,378	(301)	205	569	688	337	135	1,116	614
2021	1,523	(356)	241	681	783	407	149	1,246	697

Notes: 1. "Victim participation" refers to the total number of victims for each applied measure who were allowed to participate in trials at the courts of first instance. Numbers in parentheses indicate the number of those who participated in *saiban-in* trials.

2. "Closing statements/recommendation of punishment" refers to the total number of participating victims who stated opinions on fact-finding or application of law pursuant to the provisions of Article 316-38 of the Code of Criminal Procedure.

Source: Annual Report of Judicial Statistics
The General Secretariat, Supreme Court

Victims or others may express their feelings and opinions on the case in a public trial or submit written opinions in lieu of oral statements.

A court may take measures for witness protection in a trial, such as placing a shield in front of a witness, allowing a witness to stay in a separate room and communicate by video-link with a courtroom during his/her testimony, and/or allowing a witness to be accompanied by an appropriate person.

As another protective measure, a court, upon request, may render a ruling providing that names, addresses or other matters of victims, witnesses and others shall not be disclosed in an open court.

When a victim and an offender reached a civil settlement, it could become an enforceable title of obligation if terms of the settlement are included in a trial record of a criminal case. Additionally, a court hearing a criminal case concerning a specific serious offense may, upon request by a victim of a crime, continue with a civil case by referring to the record of the criminal case after the conviction and render a **compensation order**.

In addition, in general, courts allow victims to inspect and copy case records.

Table 6-2-2 shows the status of such measures taken for victims or witnesses.

Table 6-2-2 Applied measures for victims/witnesses

(2017-2021)

Year	Statement of opinions	Submission of documents instead of oral statement	Witness protection			Decision to conceal the identities of victims	Decision to conceal the identities of witnesses	Civil settlement in criminal proceedings	Compensation order	Inspection/copying of trial records
			Shielding	Video-link	Accompanying person					
2017	1,072	526	1,105	225 (...)	78	3,351	116	26	295	1,254
2018	1,169	546	1,461	317 (15)	144	3,846	174	18	309	1,281
2019	1,130	544	1,505	341 (23)	118	4,025	240	18	318	1,180
2020	920	536	1,237	302 (38)	107	3,923	156	25	289	1,140
2021	995	638	1,335	412 (92)	133	4,266	182	19	344	1,333

Notes: 1. "Statement of opinions", "submission of documents instead of oral statement", "witness protection", "decision to conceal the identities of victims", "civil settlement in criminal proceedings", and "inspection/copying of trial records" are counted as of the day of final judgment, etc.

If a court rendered its decision on the measure in or before 2016 and its final judgment was rendered in or after 2017, such a case is not counted as one in 2017 but in the year of the decision.

2. Numbers for "statement of opinions", "submission of documents instead of oral statement", "witness protection", "decision to conceal the identities of victims" and "decision to conceal the identities of witnesses" indicate the total number of victims or witnesses at high courts, district courts and summary courts.

3. Numbers for "civil settlement in criminal proceedings" indicate the number of cases at high courts, district courts and summary courts in which civil disputes between victims and the accused reached settlements whose terms were included in criminal trial records.

4. The number of "decision to conceal the identities of witnesses" has been counted since December 2016 with the commencement of the measure.

5. Numbers for "compensation order" indicate the number of (criminal) cases at district courts in which victims requested compensation orders for their damage.

6. Numbers for "inspection/copying of trial records" indicate the number of cases where victims or other applicable persons inspected or copied trial records at a high court, district court, or summary court.

7. Numbers in parentheses in "video-link" indicate the number of witnesses who were summoned to places outside of courts and examined thereat (included in the number of "video-link"). The number has been counted since June 2018 with the commencement of the measure.

Chapter 2 Crime Trends during the COVID-19 Pandemic

Section 1 Trends in Major Crimes

Fig. 7-2-1-1 [1] shows the monthly trend in the number of reported cases for Penal Code offenses from 2019 to 2021.

Fig. 7-2-1-1 [2] shows a comparison between reported cases for Penal Code offenses in the same month of 2019-2021, and the monthly averages of 2015-2019. The monthly averages of 2015-2019 are converted to 100.

Fig. 7-2-1-1 [3] shows a comparison between reported cases for Penal Code offenses in the same month of 2019-2021, and the floating populations (mobility of individuals) around the five major rail terminals.

Fig. 7-2-1-1 Penal Code offenses: reported cases

(2019-2021)

[1] Number of reported cases

(thousand cases)

	2020	2021
Jan	53,962	41,415
Feb	50,109	41,899
Mar	57,807	49,062
Apr	47,220	47,635
May	45,759	47,110
Jun	52,613	49,991
Jul	49,720	48,110
Aug	51,296	48,035
Sep	51,234	47,157
Oct	54,477	48,988
Nov	52,269	51,642
Dec	47,765	47,060

[2] Average of each month from 2015 to 2019 = 100 index

[3] Comparison with mobility of individuals

Notes: 1. The numbers of monthly reported cases are calculated based on resources provided by the Criminal Investigation Bureau, National Police Agency.
 2. "Floating population around major rail terminals" is calculated on the basis of resources provided by AGOOP Corp., which indicates the total of the average floating populations within a 500-meter radius of the five major rail terminals (See Notes 2 of Fig. 7-1-2) as of 3:00 p.m. in each month.

Source: The Research and Training Institute

Section 2 Trends in Other Crimes

1 Spousal offenses

Fig. 7-2-2-1 shows the monthly trend in the number of domestic violence consultations since Fiscal Year 2019.

Fig. 7-2-2-1 Domestic violence consultations

Notes: 1. Numbers are based on data in and after FY 2019 for which statistical materials are available.
 2. "Consultation centers" refer to Spousal Violence Counseling and Support Centers and "DV Hotline Plus" refers to Domestic Violence Hotline Plus.
 3. Numbers for "DV Hotline Plus" are shown after April 20, 2020 when it was newly established to provide telephone, online chat, and e-mail consultation services in response to the COVID-19 outbreak.
 4. Since some consultation centers did not collect monthly numbers in 2019, the actual number of consultations in FY 2019 (119,276) does not equal to the sum of the numbers of consultations in each month of FY 2019.

PART 8

Special Feature: Attitudes and Values of Offenders and Juvenile Delinquents

72nd Brighter Society Campaign

Source: Rehabilitation Bureau, Ministry of Justice

Chapter 1 Subject of the Research

The purpose of this Part is to understand the various attitudes and values held by offenders and juvenile delinquents, as well as to identify risk factors for crime and delinquency and needs for rehabilitation. This report is an analysis of the fifth survey conducted in 2021 following four surveys of 1990, 1998, 2005, and 2011 by the Research and Training Institute. The subject of the current research includes prison inmates, juvenile classification home inmates, and probationers/parolees. A questionnaire survey was conducted in January 2021.

Fig. 8-1-1 shows the respondent profile for the survey.

Table 8-1-1 Respondent profile

[1] Characteristics

	Total [1,419]	Offenders		Juvenile delinquents	
		Inmates [595]	Probationers/ parolees [388]	Inmates [184]	Probationers/ parolees [252]
Gender					
Male	1,247 (89.1)	539 (91.7)	335 (87.2)	164 (91.1)	209 (84.3)
Female	153 (10.9)	49 (8.3)	49 (12.8)	16 (8.9)	39 (15.7)
Age					
-15	42 (3.0)	24 (13.3)	18 (7.5)
16-17	127 (9.2)	66 (36.7)	61 (25.3)
18-19	252 (18.2)	90 (50.0)	162 (67.2)
20-29	165 (11.9)	87 (14.9)	78 (20.5)
30-39	218 (15.7)	136 (23.3)	82 (21.6)
40-49	258 (18.6)	160 (27.4)	98 (25.8)
50-64	238 (17.2)	146 (25.0)	92 (24.2)

0	81 (8.2)	...	81 (20.9)
1	421 (42.9)	249 (41.8)	172 (44.4)
2+	480 (48.9)	346 (58.2)	134 (34.6)
Prior protective measures					
N/A	1,009 (72.5)	455 (76.6)	262 (69.7)	108 (59.0)	184 (77.3)
Children's self-reliance support facility, etc.	12 (0.9)	3 (0.5)	3 (0.8)	4 (2.2)	2 (0.8)
Probation	189 (13.6)	62 (10.4)	38 (10.1)	54 (29.5)	35 (14.7)
Juvenile training School	181 (13.0)	74 (12.5)	73 (19.4)	17 (9.3)	17 (7.1)

[2] Type of offense

	Total [1,419]	Offenders		Juvenile delinquents	
		Inmates [595]	Probationers/ parolees [388]	Inmates [184]	Probationers/ parolees [252]
Serious	83 (100.0)	37 (44.6)	27 (32.5)	15 (18.1)	4 (4.8)
Violent	110 (100.0)	31 (28.2)	17 (15.5)	35 (31.8)	27 (24.5)
Theft	415 (100.0)	190 (45.8)	143 (34.5)	44 (10.6)	38 (9.2)
Fraud	117 (100.0)	56 (47.9)	42 (35.9)	11 (9.4)	8 (6.8)
Sexual	56 (100.0)	17 (30.4)	21 (37.5)	11 (19.6)	7 (12.5)
Drug	256 (100.0)	177 (69.1)	72 (28.1)	2 (0.8)	5 (2.0)
Traffic	199 (100.0)	28 (14.1)	22 (11.1)	27 (13.6)	122 (61.3)
Others	177 (100.0)	59 (33.3)	41 (23.2)	37 (20.9)	40 (22.6)

Notes: 1. Persons with unknown profiles are excluded, except in the case of total numbers shown in square brackets.

2. Numbers are based on the age at the time of the survey.

3. Numbers in parentheses indicate the percentage of persons in the respective categories among the total number of persons, or total number of inmates (probationers/parolees) for [1], and the total number of persons in each type of offense for [2].

Source: The Research and Training Institute

Chapter 2 A Comparison by Age Group

Fig. 8-2-1 shows the family life satisfaction by age group for all respondents.

Fig. 8-2-1 All respondents: family life satisfaction (by age group)

- Notes: 1. Persons with unknown satisfaction are excluded.
 2. Numbers are based on the age at the time of the survey.
 3. Persons whose age is unknown are included in the total.
 4. Numbers in parentheses indicate the actual number of persons.
